Data Analysis and Applications 4 May 30 2020 Data analysis as an area of importance has grown exponentially, especially during the past couple of decades. This can be attributed to a rapidly growing computer industry and the wide applicability of computational techniques, in conjunction with new advances of analytic tools. This being the case, the need for literature that addresses this is self-evident. New publications are appearing, covering the need for information from all fields of science and engineering, thanks to the universal relevance of data analysis and statistics packages. This book is a collective work by a number of leading scientists, analysts, engineers, mathematicians and statisticians who have been working at the forefront of data analysis. The chapters included in this volume represent a cross-section of current concerns and research interests in these scientific areas. The material is divided into three parts: Financial Data Analysis and Methods, Statistics and Stochastic Data Analysis and Methods, and Demographic Methods and Data Analysis- providing the reader with both theoretical and applied information on data analysis methods, models and techniques and appropriate applications.

U.S. Army Register Nov 28 2022

This Day in American History, 4th ed. Feb 07 2021 This up-to-date fourth edition of the most important and interesting data--on a day by day basis--throughout American history includes more than 1,400 new entries with information on a wide variety of subjects--both the "important" matters (Supreme Court decisions, war events, scientific breakthroughs, etc.) and the lesser known but thought provoking incidents and phenomena (societal changes, unexpected events) that add richness and depth to American history.

Lloyd's Register of Shipping 1929 Steamers Jun 11 2021 The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Lloyd's Register of Shipping 1814 Underwriters Feb 19 2022 The Lloyd's Register of Ships records the details of merchant vessels over 100 gross tonnes, which are self propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Reeds Eastern Almanac 2023 Dec 05 2020 The Reeds Eastern Almanac is the complete guide for North Sea mariners, offering ready access to essential navigation information by virtue of its clear layout and user friendly format, covering the UK east coast from Ramsgate to Cape Wrath including the Shetland and Orkney Islands, and from Nieuport to Delfzijl and Helgoland. Completely updated for 2023, topics include seamanship, pilotage, tide tables, safety procedures, navigation tips, radio, lights, waypoints, weather forecast information around UK and European waters, communications, Mayday and distress procedures. The large type and clear layout makes information easy to read even in adverse conditions. This handy volume is ideal for anyone cruising the North Sea. Includes a free Reeds Marina Guide. Also available: free supplements of up-to-date navigation changes from January to June at: www.reedsnauticalalmanac.co.uk 'There are some things I would not go to sea without - Reeds is one of them.' Sir Chay Blyth

United States and Allied Submarine Successes in the Pacific and Far East During World War II, 4th ed. Sep 02 2020 Here is a comprehensive accounting of all United States and allied submarine attacks on the Japanese for which success was claimed or occurred. The expanded coverage focuses on successes by U.S. and British and Dutch submarines in the Pacific and Indian oceans, Soviet submarines, and losses caused by mines laid by submarines. The book also includes details from top-secret "Ultra" messages decoded during the war and recently translated documents that provide correct Japanese ship names, ship type and tonnage, convoy names, human loss numbers and other attack details, as well as a military evaluation of each attack.

Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Tracing the Undersea Dragon Dec 29 2022 This book is a comprehensive study of the development of China's nuclear-powered ballistic missile submarines (SSBNs). It offers insights into the secretive world of nuclear submarines and ballistic missiles of the Chinese (PLA) Navy and studies how these are likely to grow in the next two decades. The volume examines the technological origins of the design and development of Chinese nuclear submarines, ballistic missiles, and their naval construction capabilities. It provides an analysis of the underlying Chinese nuclear doctrine, China's maritime geographical constraints for submarine operations, and the credibility of its sea-based deterrence. It draws upon strategy, nuclear policy, technology, geography, and operational considerations to holistically predict the likely SSBN force levels of the PLA Navy for various scenarios. The book also assesses the spectrum of threats likely from the undersea domain for India and other nations in the Indo-Pacific region. A key text on an obscure but vital facet of Chinese defence studies, this book will be useful for scholars and researchers of strategic affairs, international relations and disarmament studies, peace and conflict studies, geopolitics, foreign policy, Indo-Pacific studies, and diplomacy.
