Famous Anus May 18 2021 From the co-host of the wildly popular gay podcast, Shame On You, comes a hilarious, honest, and sometimes raunchy memoir documenting a decade-long descent into chaos.

When Jordan Power checks himself into a mental hospital in the midst of a breakdown, he walks away without answers or prescription drugs — not for lack of asking. Gay, twenty-three, and newly single in downtown Toronto, Power can't get out of his own way as he begins the journey of trying to figure out the world and himself, one self-destructive step at a time. Power's unfiltered and humorous account of his path toward growing up and finding love is full of wild tales including run-ins with exes while on LSD, sleeping with his boss, blacking out in Rio, and of course, reconstructive asshole surgery. Acid-tongued Power's debut novel Famous Anus is a how-not-to guide, showing that even lacking the most basic coping mechanisms, if you're able to find humor in everything, life — like assholes — can eventually be put back together.

The Broadcaster's Guide to RBDS Feb 24 2022 This handbook is intended to give the broadcast industry an authoritative guide to the Radio Data System (RDS), also called Radio Broadcast Data System (RBDS). Since the standard's adoption, about 700 stations have begun broadcasting RDS in the United States. There is a wide variety of encoding equipment with prices starting as low as \$400, and over 30 models of RDS receivers have been introduced for cars, home receivers, portable and even PC receivers. Automobile manufacturer's such as General Motors, Ford, Audi, and Porsche now offer RDS on new vehicles. Yet despite all the support equipment in place, the FM broadcaster has been reluctant to implement and utilize this service, mainly because of a lack of understanding of what RDS can do for the station. This book finally provides the information required to understand RDS and its possibilities on a variety of levels, so that everyone involved in radio can make the most of it. Station owner, program director, salesperson, and talent alike will find the information he or she requires to maximize the possibilities of this new technology. Each feature of the system is explained in terms of its practical implementation at the station, and interviews with broadcasters currently using the system add a hands-on perspective. Scott Wright is a recognized pioneer in RDS development. As the designer of Delco Electronics' first RDS receiver, he has been extremely active in the development of the RDS standard in the US and in efforts to educate the broadcast community about its potential. He has represented Delco at the European Broadcasting Union's (EBU) RDS Forum and is currently the Chairman of the National Radio Systems Committee RBDS Subcommittee, the US standard-setting body. He is also a member of the Electronics Industries Association's (EIA) RDS Forum.

She begins probing local officials, not realizing that she and Jonathan are both on a collision course with a deadly web of hackers, spies and assassins.
