Individual Development and Social Change Dec 15 2020 Individual Development and Social Change: Explanatory Analysis represents a convergence of three lines of emphasis now visible in developmental research and theory building. The three are (1) the life course as a focus for the study of development and social change, and their interrelationships; (2) the life-span orientation to the study of individual development, with its acknowledgment of the salience of contextual features for understanding development; and (3) the growth of methodological innovations that provide more appropriate and powerful ways of exploiting data gathered to describe and explain developmental change processes. The book opens with a study on how major cultural change originates and unfolds over time. This is followed by separate chapters on the use of sequential designs for explanatory analyses; evolutionary aspects of social and individual development; the concepts of the theory of causal and weak causal regressive dependence; and the concepts of age, period, and cohort from the perspective of developmental psychology. Subsequent chapters examine development and aging as lifelong processes of historical populations; the methodological integration of natural and cultural science perspectives in developmental psychology; and application of the multifaceted methodology to the mutuality of constraint between sociocultural group and individual dynamics.

Heinz Kohut and the Psychology of the Self Mar 30 2022 Heinz Kohut's work represents an important departure from the Freudian tradition of psychoanalysis. A founder of the Self Psychology movement in America, he based his practice on the belief that narcissistic vulnerabilities play a significant part in the suffering that brings people for treatment. Written predominantly for a psychoanalytic audience Kohut's work is often difficult to interpret. Siegel uses examples from his own practice to show how Kohut's innovative theories can be applied to other forms of treatment.

Trial and Error: The Autobiography of Chaim Weizmann Aug 03 2022 Chaim Weizmann's autobiography is a highly personal account of his life in the Zionist movement. Book One, completed in 1941, covers the years 1874-1917 and Book Two covers the years 1918-1948. Weizmann describes the Russian shtetl where he was born in 1874, his schooling in Pinsk and his university studies in Berlin, Geneva and Freiburg (Switzerland) where he received his PhD in chemistry in 1899 before moving to Manchester in 1904. He portrays many leading Zionists such as Theodor Herzl, Achad Ha-am, Max Nordau, Shmarya Levin, Ussishkin, Jabotinsky, Ruppin. He describes the opposition by assimilationist Jews (like Edwin Montagu) to Zionism, and internal debates within the Zionist movement, such as the defeat of Herzl's Uganda plan — bitterly opposed by Weizmann — at the 6th Zionist Congress (1903) and his frictions with the American Zionists led by Brandeis. Weizmann describes how, during World War I, his work on acetone brought him into contact with British political leaders such as Lloyd George, Arthur Balfour and Winston Churchill and facilitated the Balfour Declaration which, in 1917, paved the way for “the establishment in Palestine of a national home for the Jewish people”. Weizmann recounts his role in the creation of what would become Israel's leading scientific institutions, the Hebrew University, the Weizmann Institute of Science and the Technion, including his fundraising efforts in Europe and in the United States on their behalf and for other Zionist initiatives. He became the first President of Israel, and died in office in 1952. “... one of the important historical documents of our time.” — Orville Prescott, The New York Times (January 19, 1949) “[Trial and Error] is likely to be read for many years to come as an authoritative exposition of the Zionist movement ... records eye-witness accounts of so many crucial events and reflects so many deep insights that it is certain to become of permanent value to the scholar and a delight to the general reader.” — Salo Baron, The New York Times (January 23, 1949) “There are four angles from which one can approach this book. One can take it as a history of Zionism during the last seventy years... a record of personal endeavour triumphant over obstacles and dissension... a sad commentary upon human achievement, when eventual triumph comes at a date, and in circumstances, which rob it of its full savour... the self-portrait of a most remarkable man.” — Harold Nicolson, The Observer (March 27, 1949) “Notable in this intellectually candid record is the fact that [Weizmann] embraced and propagated Jewish nationalism because he regarded it as a positive good, not merely a negative escape from gentile persecution. This intensely human book, which in a sense is the story of modern Zionism, constitutes one of the indispensable sources for the history of our times.” — Robert Gale Woolbert, Foreign Affairs (July 1949) “[Weizmann's] autobiography ... is an astonishingly objective and life-like narrative, without a trace of dramatization, exaggeration, vanity, self-pity, self-justification; it conveys his authentic, richly and evenly developed, autonomous, proud, firmly built, somewhat ironical nature, free from inner conflict, in deep, instinctive harmony with the forces of nature and society, and therefore possessed of natural wisdom, dignity and authority.” — Sir Isaiah Berlin, Chichele Professor of Social and Political Theory, Oxford University (November 19, 1957) “Ranks between Churchill's war memoirs and those of Nehru, Masaryk and Trotzky, among the founders' own stories ... above all a human book, the record of the experiences and reactions of a man who fought over issues that were important” — Congress Bulletin (April 1949)

Key Concepts in Social Gerontology Oct 25 2021 "Far from a dictionary, the concepts are portrayed as complex, and conflicting definitions and usages are both noted and evaluated... Each article includes a (necessarily selective) set of references, and cross-references to other concepts included in the book... Moreover, the coverage and evaluation of the concepts is right at the current leading edge in a rapidly moving field." - Victor Marshall, Department of Sociology and Institute on Aging, University of North Carolina at Chapel Hill "The concepts are very clear and very relevant, and fantastic for my group of undergraduate students... I found each concept to be succinctly and simply captured, holding enough information to satisfy initial cravings and complex enough to tempt further reading... I had originally thought that this book would provide supplementary reading as part of my 'Healthy Ageing' course, but have changed my mind to essential reading now I have had the opportunity to read the entire book." - Dr Meredith Tavener, Groningen University Social gerontology is a new and dynamic field reflecting the increasing interest in ageing across the world. This book provides a readily accessible guide to well established and contested issues, as well as new concepts emerging through cutting edge research in the discipline. The entries give concise, lucid knowledge on what constitutes the 'building blocks' of social gerontology and sets out a clear review of the core concepts, both classic and emerging, in this subject area. Each concept is explored in terms of its history, application, usefulness to theory and research, and significance in practice. They go beyond simple definitions of the concepts to look at how each issue has shaped the discipline of social gerontology today. This book is authored by social gerontologists from the UK and the USA. Together they present an interdisciplinary perspective and reflect a global approach to the presentation of key concepts in social gerontology.

How Israelis and Palestinians Negotiate Feb 14 2021 Refreshing and revealing in equal measure, this innovative volume conducts a critical/self-critical exploration of the impact of culture on the ill-fated Oslo peace process. The authors negotiators and scholars alike demolish stereotypes as they construct an unusually subtle and sophisticated understanding of how culture influences negotiating styles. Culture, they argue, did not cause the Oslo breakdown but it did play an influential, intervening role at several levels: coloring the thinking of political leaders, shaping domestic politics on both sides, and affecting each side's evaluation of the other's beliefs and intentions. After an overview by William Quandt of the history of the Oslo process and the impact of international factors such as U.S. mediation, the volume presents a detailed analysis of first Palestinian, and then Israeli negotiating styles between 1993 and 2001. Omar Dajani, a former legal advisor to the Palestinian team, explains how elements of Palestinian identity and national development have hobbled the Palestinians' ability to negotiate effectively. Aharon Klieman, a distinguished Israeli analyst, traces a long-standing clash between diplomatic and security subcultures within the Israeli political elite and reveals how Israeli identity has helped create a negotiating style that opts for short-term gains while undermining the prospects for a lasting agreement. Drawing on these insights, Tamara Wittes concludes the volume by offering not only a fresh appreciation of culture's influence on interethnic negotiations but also lessons for future negotiators in the Israeli-Palestinian conflict. Read the review from Foreign Affairs."

Human Growth Hormone Pharmacology Sep 23 2021 This book addresses a wide range of basic and clinical issues in the physiology and pharmacology of growth hormone. The volume is organized like a textbook. It begins with factors contributing to GH gene expression, the functional relationships of the GH receptor, molecular biological analysis of the GH-GH receptor complex and proceeds to describe the insulin-like growth factor axis. Transgenic models are discussed for analysis of discrete effects. These discussions provide a bridge to clinically oriented discussions of growth abnormalities in GH deficient children, GH insensitivity due to deficiency of the GH receptor, and the concept of aging as a GH/IGF-I deficiency state. Discussions also include the immune system as a source and a responder to GH, GHRH, IGF-I and the effects of GH excess.
