**Hiking the Horizontal** Aug 22 2019 The unique career of choreographer Liz Lerman has taken her from theater stages to shipyards, and from synagogues to science labs. In this wide-ranging collection of essays and articles, she reflects on her life-long exploration of dance as a vehicle for human insight and understanding of the world around us. Lerman has been described by the Washington Post as “the source of an epochal revolution in the scope and purposes of dance art.” Here, she combines broad outlooks on culture and society with practical applications and accessible stories. Her expansive scope encompasses the craft, structure, and inspiration that bring theatrical works to life as well as the applications of art in fields as diverse as faith, aging, particle physics, and human rights law. Offering readers a gentle manifesto describing methods that bring a horizontal focus to bear on a hierarchical world, this is the perfect book for anyone curious about the possible role for art in politics, science, community, motherhood, and the media. The paperback edition includes an afterword

with updates and additions to each section of the book. Ebook Edition Note: Two images have been redacted, on page 200, Dances at a Cocktail Party, and on page 201, the bottom photo of Small Dances about Big Ideas.

**A Time to Live** Jul 01 2020 In *A Time To Live*, Robert Raines explores the spiritual and emotional dimensions of what can be the most rewarding time of life. Drawing on his experiences as an ordained minister and as director of a non-denominational retreat center focusing on issues of personal growth, Raines delineates the important passages we must all make from our middle years in the process of growing older. In an approach that is both meditative and inspirational, drawing from a variety of backgrounds, anecdotes, and literature, Raines provides a new perspective on the aging process and its implications. To make the most of this ultimate period of life, he argues, we must each confront certain issues: waking up to mortality, embracing sorrow, savoring blessedness, re-imagining work, nurturing intimacy, seeking forgiveness, and taking on the mysterious process of exploring what is yet to be done in life with a sense of possibility and hope. For the millions of baby boomers just entering their fifties and others approaching their sixties who are determined to be aware and take advantage of the challenges they face, *A Time To Live*, is the only book to directly address their needs. Sure to be a welcome and important spiritual guide for many, it offers the possibility of fulfillment and personal satisfaction.

**Creative Environments** Nov 05 2020 *Creative Environments* follows up on the book *Creative Space*, by the same authors, who serve this time as editors. **Antique Dealing and Creative Reuse in Cairo and Damascus 1850-1890** Nov 24 2019 "The commodification of Islamic antiques intensified in the late Ottoman Empire, an age of domestic reform and increased European interference following the Tanzimat (reorganisation) of 1839. Mercedes Volait examines the social life of typical objects moving from Cairo and Damascus to Paris, London, and beyond, uncovers the range of agencies and subjectivities involved in the trade of architectural salvage and historic handicraft, and traces impacts on private interiors, through creative reuse and Revival design, in Egypt, Europe and America. By devoting attention to both local and global engagements with Middle Eastern tangible heritage, the present volume invites to look anew at Orientalism in art and interior design, the canon of Islamic architecture and the translocation of historic works of art"--

**Art Therapy and Creative Aging** Dec 30 2022 *Art Therapy and Creative Aging* offers an integrated perspective on engaging with older people through the arts. Drawing from the author's clinical, research and teaching experiences, the book explores how arts engagement can intertwine with and support healthy aging. This book combines analysis of current development theory, existing research on creative programs with elders, and case examples of therapeutic experience to critically examine ageism and demonstrate how art therapy and creative aging approaches can harness our knowledge of the cognitive and emotional development of older adults. Chapters cover consideration of generational, cultural, and historical factors; the creative, cognitive and emotional developmental components of aging; arts and art therapy techniques and methods with older adults with differing needs; and examples of best practices. Creative arts therapists, creative aging professionals, and students who seek foundational concepts and ideas for arts practice with older people will find this book instrumental in developing effective ways of using the arts to promote health and well-being and inspire engagement with this often-underserved population.

**Solo and Smart** Feb 26 2020 In *Solo and Smart*, Carol reveals her step-by-step strategy for creating a more golden future, inspiring readers to take action to plan for their health, wealth, and more-and giving them hope. Readers realize they aren't entirely at the mercy of what inevitably befalls most elders and that

they can exercise some control over their future by taking some concrete steps. Carol teaches readers an easy, surefire method to self-discover, self-assess, and self-plan-giving them full control over how they want to live in the years ahead. Readers will identify and evaluate their current challenges and then build the skills and confidence to get ahead of any landmines. She teaches readers not only how to age well but how to live well-by shaping the future they want rather than reacting to it. And Carol is living proof. Using the blueprint outlined in this book, Carol has created a successful, thriving lifestyle. She is independent, connected, safe, satisfied, healthy, and strong. This is what readers can enjoy if they follow the processes in the book. In *Solo Aging*, Carol speaks directly to the growing population of "solo agers," or people aged fifty-five and up who do or will not have the traditional familial supports most of our ancestors counted on as elders. The number of adults who live alone and far from family is growing. Relying on data from the University of Michigan Health and Retirement Study (HRS), Harvard researchers examined trends among adults aged sixty-one to sixty-three over a twenty-year period (1994-2014). During this time, the percentage of adults living without a spouse or significant other grew from 25 percent to 31 percent. The number of older adults who live within 10 miles of a relative fell by 12 percent. It's common for siblings and children to live far away from one another, and the days of the three-generation household are, for the most part, long gone. Over the next forty years, solo aging is expected to be a major source of stress for close to 25 million of the sixty-five-plus population.

**Creativity in Later Life** Sep 15 2021 This collection begins with two premises: that our understanding of the nature and forms of creativity in later life remains limited and that dialogue between specialists in gerontology, the arts and humanities can produce the crucial new insights that are so obviously needed. Representing the outcome of ongoing dialogue across the disciplinary divide, the contributions of this volume reflect anew on what we share and how we differ; creating new narratives so as to build an understanding of late-life creativity that goes far beyond the narrow confines of the pervasively received idea of 'late style'. Creativity in Later Life encompasses a range of personal reflections and discussions of the boundaries of creativity, including: Canonical artistic achievements to community art projects Narratives of carers for those living with dementia Analyses of creative theory Through these insightful chapters, the authors consequently offer an understanding of creativity in later life as varied, socialised and - above all - located in the cultural and economic circumstances of the here and now. This title will appeal to academics, practitioners and students in the various gerontological, arts and humanities fields; and to anyone with an interest in the nature of creativity in later life and the forms it takes.

Economic Foundations for Creative Ageing Policy, Volume II Feb 20 2022 Aging populations are a major consideration for socio-economic development in the early 21st century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life. Aging population is taking place in every continent of the world with Europe in the least favourable situation due to its aging population and reduction in economic competitiveness. Economic Foundations for Creative Aging Policy offers public policy ideas to construct positive answers for ageing populations. This exciting new volume searches for economic solutions that can enable effective social policy concerning the elderly. Klimczuk covers theoretical analysis and case study descriptions of good practices, to suggest strategies that could be internationally popularised.

*Creative Care* Apr 10 2021 A MacArthur Genius Grant recipient pioneers a radical change in how we interact with older loved ones, especially those experiencing dementia, as she introduces a proven method that uses the creative arts to bring light and joy to the lives of elders. In *Creative Care*, Anne Basting lays the groundwork for a widespread transformation in our approach to elder care and uses compelling, touching stories to inspire and guide us all—family, friends, and health professionals—in how to connect and interact with those living with dementia. A MacArthur Genius Grant recipient, Basting tells the story of how she pioneered a radical change in how we interact with our older loved ones. Now used around the world, this proven method has brought light and joy to the lives of elders—and those who care for them. Here, for the first time, everyone can learn these methods. Early in her career, Basting noticed a problem: today's elderly—especially those experiencing dementia and Alzheimer's—are often isolated in nursing homes or segregated in elder-care settings, making the final years of life feel lonely and devoid of meaning. To alleviate their sense of aloneness, Basting developed a radical approach that combines methods from the world of theater and improvisation with evidence-based therapies that connect people using their own creativity and imagination. Rooted in twenty-

five years of research, these new techniques draw on core creative exercises—such as “Yes, and . . .” and “Beautiful Questions.” This approach fosters storytelling and active listening, allowing elders to freely share ideas and stories without worrying about getting the details “correct.” Basting’s research has shown that these practices stimulate the brain and awaken the imagination to add wonder and awe to patients’ daily lives—and provide them a means of connection, both with the world and with those caring for them. Creative Care promises to bring light and hope to a community that needs it most.

**Elderhood** Dec 26 2019 Finalist for the Pulitzer Prize in General Nonfiction A New York Times Bestseller Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction Winner of the WSU AOS Bonner Book Award As revelatory as Atul Gawande's *Being Mortal*, physician and award-winning author Louise Aronson's *Elderhood* is an essential, empathetic look at a vital but often disparaged stage of life. For more than 5,000 years, "old" has been defined as beginning between the ages of 60 and 70. That means most people alive today will spend more years in elderhood than in childhood, and many will be elders for 40 years or more. Yet at the very moment that humans are living longer than ever before, we've made old age into a disease, a condition to be dreaded, denigrated, neglected, and denied. Reminiscent of Oliver Sacks, noted Harvard-trained geriatrician Louise Aronson uses stories from her quarter century of caring for patients, and draws from history, science, literature, popular culture, and her own life to weave a vision of old age that's neither nightmare nor utopian fantasy--a vision full of joy, wonder, frustration, outrage, and hope about aging, medicine, and humanity itself. *Elderhood* is for anyone who is, in the author's own words, "an aging, i.e., still-breathing human being."

The Age of Ideas Jul 13 2021 The "platform model" is transforming business, making creativity the last sustainable advantage. *The Age of Ideas* explores the implications of the new paradigm, offering a practical and inspirational framework to help you discover your inner purpose and turn it into a fulfilled, empowered existence. A landmark work on modern entrepreneurship.

**Slackonomics** Jun 12 2021 Generation X grew up in the 1980s, when Alex P. Keaton was going to be a millionaire by the time he was thirty, greed was good, and social activism was deadlier than disco. Then globalization and the technological revolution came along, changing everything for a generation faced with bridging the analog and digital worlds. Living in a time of "creative destruction" - when an old economic order is upended by a new one - has deeply affected everyday life for this generation; from how they work, where they live, how they play, when they marry and have children to their attitudes about love, humor, happiness, and personal fulfillment. Through a sharp and entertaining mix of pop and alt-culture, personal narrative, and economic analysis, author Lisa Chamberlain shows how Generation X has survived and even thrived in the era of creative destruction, but will now be faced with solving economic and environmental problems on a global scale.

**The Evolution of the Chinese Internet** Oct 24 2019 This book addresses digital cultural formation through four dominant technological platforms over the past two decades in China.

*The Creativity Code* Sep 03 2020 "A brilliant travel guide to the coming world of AI." —Jeanette Winterson What does it mean to be creative? Can creativity be trained? Is it uniquely human, or could AI be considered creative? Mathematical genius and exuberant polymath Marcus du Sautoy plunges us into the world of artificial intelligence and algorithmic learning in this essential guide to the future of creativity. He considers the role of pattern and imitation in the creative process and sets out to investigate the programs and programmers—from Deep Mind and the Flow Machine to Botnik and WHIM—who are seeking to rival or surpass human innovation in gaming, music, art, and language. A thrilling tour of the landscape of invention, *The Creativity Code* explores the new face of creativity and the mysteries of the human code. "As machines outsmart us in ever more domains, we can at least comfort ourselves that one area will remain sacrosanct and uncomputable: human creativity. Or can we?...In his fascinating exploration of the nature of creativity, Marcus du Sautoy questions many of those assumptions." —Financial Times "Fascinating...If all the experiences, hopes, dreams, visions, lusts, loves, and hatreds that shape the human imagination amount to nothing more than a 'code,' then sooner or later a machine will crack it. Indeed, du Sautoy assembles an eclectic array of evidence to show how that's happening even now." —The Times

**The Expressive Lives of Elders** Jan 27 2020 Essays examining the power of traditional arts and folklore in the lives of the elderly in the United States. Can traditional arts improve an older adult's quality of life? Are arts interventions more effective when they align with an elder's cultural identity? In *The Expressive Lives of Elders*, Jon Kay and contributors from a diverse range of public institutions argue that such mediations work best when they are culturally, socially, and personally relevant to the participants. From quilting and canning to weaving and woodworking, this book explores the role of traditional arts and folklore in the lives of older adults in the United States, highlighting the critical importance of ethnographic studies of creative aging for both understanding the expressive lives of elders and for designing effective arts therapies and programs. Each case study in this volume demonstrates how folklore and traditional practices help elders maintain their health and wellness, providing a road map for initiatives to improve the lives and well-being of America's aging population.

**Creative Practice Research in the Age of Neoliberal Hopelessness** May 23 2022 In *Creative Practice Research in Film and Media*, creative practitioners discuss their experiences and examine how to retain integrity during times of political and economic battles in higher education, and attempts to quantify creative work. It uses the notion of tactical compliance to evaluate whether and when creative practitioners compromise their creativity by working within the higher education system. It offers a space for reflection for both practitioners and theorists, and it presents a much-needed intervention, which will be of interest to all academics engaged with creative practice as research.

**Creative Selection** Jun 24 2022 \* WALL STREET JOURNAL BESTSELLER \* An insider's account of Apple's creative process during the golden years of Steve Jobs. Hundreds of millions of people use Apple products every day; several thousand work on Apple's campus in Cupertino, California; but only a handful sit at the drawing board. Creative Selection recounts the life of one of the few who worked behind the scenes, a highly-respected software engineer who worked in the final years of the Steve Jobs era—the Golden Age of Apple. Ken Kocienda offers an inside look at Apple's creative process. For fifteen years, he was on the ground floor of the company as a specialist, directly responsible for experimenting with novel user interface concepts and writing powerful, easy-to-use software for products including the iPhone, the iPad, and the Safari web browser. His stories explain the symbiotic relationship between software and product development for those who have never dreamed of programming a computer, and reveal what it was like to work on the cutting edge of technology at one of the world's most admired companies. Kocienda shares moments of struggle and success, crisis and collaboration, illuminating each with lessons learned over his Apple career. He introduces the essential elements of innovation—inspiration, collaboration, craft, diligence, decisiveness, taste, and empathy—and uses these as a lens through which to understand productive work culture. An insider's tale of creativity and innovation at Apple, Creative Selection shows readers how a small group of people developed an evolutionary design model, and how they used this methodology to make groundbreaking and intuitive software which countless millions use every day.

**Creative Space** Dec 18 2021 Creative Space summarizes and integrates the various up-to-date approaches of computational intelligence to knowledge and technology creation including the specific novel feature of utilizing the creative abilities of the human mind, such as tacit knowledge, emotions and instincts, and intuition. It analyzes several important approaches of this new paradigm such as the Shinayakana Systems Approach, the organizational knowledge creation theory, in particular SECI Spiral, and the Rational Theory of Intuition – resulting in the concept of Creative Space. This monograph presents and analyzes in detail this new concept together with its ontology – the list and meanings of the analyzed nodes of this space and of the character of transitions linking these nodes.

**Education in the Creative Economy** Dec 06 2020 Education in the Creative Economy explores the need for new forms of learning and education that are most conducive to supporting student development in a creative society. Just as the assembly line shifted the key factor of production from labor to capital, digital networks are now shifting the key factor of production from capital to innovation. Beyond conventional discussions on the knowledge economy, many scholars now suggest that digital technologies are fomenting a shift in advanced economies from mass production to cultural innovation. This edited volume, which includes contributions from renowned scholars like Richard Florida, Charles Landry, and John Howkins, is a key resource for policymakers, researchers, teachers and journalists to assist them to better understand the contours of the creative economy and consider effective strategies for linking education to creative practice. In addition to arguments for investing in the knowledge economy through STEM disciplines (science, technology, engineering and math),

this collection explores the growing importance of art, design and digital media as vehicles for creativity and innovation.

**Designing for Older Adults** Oct 16 2021 As life expectancy increases, older workers and the retired form a large and growing proportion of the world's population. Professionals working to develop systems and environments need to better accommodate the user needs of the older adult. This new guide provides a practical introduction to human factors and the older adult. It considers the subject primarily from an engineering psychology perspective, heavily grounded in today's scientific knowledge. The authors show how current understanding of age-related issues of perception, cognition, and movement control can be applied in practice. They also provide a reference source with guidelines and advice for design issues ranging from lighting, computer input device selection, and web site design, to training program development and work task design. The text draws on research-oriented work and presents this in a form that can be used by the broad audience of product designers, health care practitioners, managers, and others who need answers to problems and require sound recommendations for design.

**This Chair Rocks** May 31 2020 Author, activist, and TED speaker Ashton Applewhite has written a rousing manifesto calling for an end to discrimination and prejudice on the basis of age. In our youth obsessed culture, we're bombarded by media images and messages about the despairs and declines of our later years. Beauty and pharmaceutical companies work overtime to convince people to purchase products that will retain their youthful appearance and vitality. Wrinkles are embarrassing. Gray hair should be colored and bald heads covered with implants. Older minds and bodies are too frail to keep up with the pace of the modern working world and olders should just step aside for the new generation. Ashton Applewhite once held these beliefs too until she realized where this prejudice comes from and the damage it does. Lively, funny, and deeply researched, This Chair Rocks traces her journey from apprehensive boomer to pro-

aging radical, and in the process debunks myth after myth about late life. Explaining the roots of ageism in history and how it divides and debases, Applewhite examines how ageist stereotypes cripple the way our brains and bodies function, looks at ageism in the workplace and the bedroom, exposes the cost of the all-American myth of independence, critiques the portrayal of elders as burdens to society, describes what an all-age-friendly world would look like, and offers a rousing call to action. It's time to create a world of age equality by making discrimination on the basis of age as unacceptable as any other kind of bias.

Whether you're older or hoping to get there, this book will shake you by the shoulders, cheer you up, make you mad, and change the way you see the rest of your life. Age pride! "Wow. This book totally rocks. It arrived on a day when I was in deep confusion and sadness about my age. Everything about it, from my invisibility to my neck. Within four or five wise, passionate pages, I had found insight, illumination, and inspiration. I never use the word empower, but this book has empowered me." —Anne Lamott, New York Times bestselling author

**Cultivating Copyright** Nov 17 2021 Creators and creative industries are struggling to navigate the digital age. Intellectual property rights, including copyrights, trademarks, and patents, offer invaluable tools to help creative industries remain viable and sustainable.
