Neoliberal Paraguay is additionally useful. You have remained in right site to start getting this info. get the Guerrilla Auditors The Politics Of Transparency In Neoliberal Paraguay join that we find the money for here and check out the link.

You could buy lead Guerrilla Auditors The Politics Of Transparency In Neoliberal Paraguay or get it as soon as feasible. You could quickly download this Guerrilla Auditors The Politics Of Transparency In Neoliberal Paraguay after getting deal. So, taking into consideration you require the books swiftly, you can straight get it. Its in view of that utterly simple and consequently fats, isnt it? You have to favor to in this impression

The Politics of History Jun 24 2019 This book presents a series of case studies and thought-provoking essays arguing for a radical approach to history and providing a revisionist interpretation of the historian's role. In a new introduction, the author responds to critics of his original work and comments further on the radicalization of history.

Friedrich Nietzsche and the Politics of the Soul Jan 12 2021 Leslie Thiele presents an original and accessible essay on the great thinker's attempt to lead a heroic life as a philosopher, artist, saint, educator, and solitary. He takes as his point of departure Nietzsche's conception of the soul as a multiplicity of conflicting drives and personae, and focuses on the task Nietzsche allotted himself "to make a cosmos out of his chaotic inheritance." This struggle to "become what you are" by way of a spiritual politics is demonstrated to be Nietzsche's foremost concern, which fused his philosophy with his life.

The Politics of the Family Feb 22 2022 Using concepts of schizophrenia, R.D. Laing demonstrates that we tend to invalidate the subjective and experiential and accept the proper societal view of what should occur within the family. A psychoanalyst and psychiatrist, Laing worked at the Tavistock Institute of Human Relations. His books include *The Self and Others* and *The Politics of Experience*.

The Politics of Home Jul 06 2020 This book examines ideas of 'home' of Americans and Western Europeans under the influence of the two major revolutions of our times: the gender revolution and increased mobility due to globalization. It analyzes how 'home' has been politicized, as well as alternative home-making strategies that aim to transcend the 'logic of identities'.

Children and the Politics of Culture Mar 02 2020 The bodies and minds of children--and the very space of children--are under assault. This is the message we receive from daily news headlines about violence, sexual abuse, exploitation, and neglect of children, and from a proliferation of books in recent years representing the domain of contemporary childhood as threatened, invaded, polluted, and "stolen" by adults. Through a series of essays that explore the global dimensions of children at risk, an international group of researchers and policymakers discuss the notion of children's rights, and in particular the claim that every child has a right to a cultural identity. Explorations of children's situations in Japan, Korea, Singapore, South Africa, England, Norway, the United States, Brazil, and Germany reveal how children's everyday lives and futures are often the stakes in contemporary battles that adults wage over definitions of cultural identity and state cultural policies. Throughout this volume, the authors address the complex and often ambiguous implications of the concept of rights. For example, it may be used to defend indigenous children from radically assimilationist or even genocidal state policies; but it may also be used to legitimate racist institutions. A substantive introduction by the editor examines global political economic frameworks

for the cultural debates affecting children and traces intriguing, sometimes surprising, threads throughout the papers. In addition to the editor, the contributors are Norma Field, Marilyn Ivy, Mary John, Hae-joang Cho, Saya Shiraishi, Vivienne Wee, Pamela Reynolds, Kathleen Hall, Ruth Mandel, Manuela Carneiro da Cunha, and Njabulo Ndebele.

The Politics of the Textbook Sep 27 2019 *The Politics of the Textbook* analyzes the political, economic and cultural factors that shape the production, distribution and reception of school texts. *The Politics of Truth, New Edition* Oct 21 2021 Two hundred years later, Michel Foucault wrote a response to Kant's initial essay, positioning Kant as the initiator of the discourse and critique of modernity.

Multiculturalism and the Politics of Guilt May 04 2020 *Multiculturalism and the Politics of Guilt* extends Paul Gottfried's examination of Western managerial government's growth in the last third of the twentieth century. Linking multiculturalism to a distinctive political and religious context, the book argues that welfare-state democracy, unlike bourgeois liberalism, has rejected the once conventional distinction between government and civil society. Gottfried argues that the West's relentless celebrations of diversity have resulted in the downgrading of the once dominant Western culture. The moral rationale of government has become the consciousness-raising of a presumed majority population. While welfare states continue to provide entitlements and fulfill the other material programs of older welfare regimes, they have ceased to make qualitative leaps in the direction of social democracy. For the new political elite, nationalization and income redistributions have become less significant than controlling the speech and thought of democratic citizens. An escalating hostility toward the bourgeois Christian past, explicit or at least implicit in the policies undertaken by the West and urged by the media, is characteristic of what Gottfried labels an

emerging “therapeutic” state. For Gottfried, acceptance of an intrusive political correctness has transformed the religious consciousness of Western, particularly Protestant, society. The casting of “true” Christianity as a religion of sensitivity only toward victims has created a precondition for extensive social engineering. Gottfried examines late-twentieth-century liberal Christianity as the promoter of the politics of guilt. Metaphysical guilt has been transformed into self-abasement in relation to the “suffering just” identified with racial, cultural, and lifestyle minorities. Unlike earlier proponents of religious liberalism, the therapeutic statist oppose anything, including empirical knowledge, that impedes the expression of social and cultural guilt in an effort to raise the self-esteem of designated victims. Equally troubling to Gottfried is the growth of an American empire that is influencing European values and fashions. Europeans have begun, he says, to embrace the multicultural movement that originated with American liberal Protestantism’s emphasis on diversity as essential for democracy. He sees Europeans bringing authoritarian zeal to enforcing ideas and behavior imported from the United States. Multiculturalism and the Politics of Guilt extends the arguments of the author’s earlier *After Liberalism*. Whether one challenges or supports Gottfried’s conclusions, all will profit from a careful reading of this latest diagnosis of the American condition. *The Politics of Representation* Apr 02 2020 As societies have become ever more complex, coupled with the increased power of the media, electoral campaigns have become a key focus of political communication research. In this important new book, an international team of experts critically examines issues of democratic representation in three culturally diverse nations whose governments are elected under systems of proportional representation - New Zealand, Germany, and Italy. The authors examine the power plays at work in the development and implementation of proportional representation in their respective countries and they consider the ways in which the electoral

system has impacted election campaign strategies. The final chapter by Douglas Kellner (George F. Kellner Philosophy of Education Chair, Social Sciences and Comparative Education, UCLA) relates the issue to contemporary politics in the United States by using the 2000 U.S. presidential election to investigate the ways in which democracy is served, and disserved, by the electoral system.

The Politics of Expertise May 16 2021 This book collects case studies and theoretical papers on expertise, focusing on four major themes: legitimation, the aggregation of knowledge, the distribution of knowledge and the distribution of power. It focuses on the institutional means by which the distribution of knowledge and the distribution of power are connected, and how the problems of aggregating knowledge and legitimating it are solved by these structures. The radical novelty of this approach is that it places the traditional discussion of expertise in democracy into a much larger framework of knowledge and power relations, and in addition begins to raise the questions of epistemology that a serious account of these problems requires.

The Politics of Uncertainty Jun 28 2022 Why is uncertainty so important to politics today? To explore the underlying reasons, issues and challenges, this book's chapters address finance and banking, insurance, technology regulation and critical infrastructures, as well as climate change, infectious disease responses, natural disasters, migration, crime and security and spirituality and religion. The book argues that uncertainties must be understood as complex constructions of knowledge, materiality, experience, embodiment and practice. Examining in particular how uncertainties are experienced in contexts of marginalisation and precarity, this book shows how sustainability and development are not just technical issues, but depend deeply on political values and choices. What burgeoning uncertainties require lies less in escalating efforts at control, but more in a new - more collective, mutualistic and convivial - politics of responsibility and care. If

hopes of much-needed progressive transformation are to be realised, then currently blinkered understandings of uncertainty need to be met with renewed democratic struggle. Written in an accessible style and illustrated by multiple case studies from across the world, this book will appeal to a wide cross-disciplinary audience in fields ranging from economics to law to science studies to sociology to anthropology and geography, as well as professionals working in risk management, disaster risk reduction, emergencies and wider public policy fields.

Politics Book Nov 02 2022 Explores several classic works of social and political thought, examining how the history of their publication materially affected their meaning and reception over time. Case studies include works by Durkheim, Mead, Marx, Du Bois, and Weber.

The Politics of Expertise in China Feb 10 2021 Since the reform and opening-up policy was implemented in China, consultations have been increasingly carried out during the policy-making process. This often involves experts, many of whom are based in think-tanks or similar institutions. The degree of access to the policy-making process varies, and consequently some experts influence the policy-making process significantly and others not. This book explores how experts in China engage with the policy-making process and the circumstances, which affect how far they are able to influence policy-making.

The Politics of Evidence (Open Access) Dec 23 2021 The Open Access version of this book, available at <http://www.tandfebooks.com/>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. There has been an enormous increase in interest in the use of evidence for public policymaking, but the vast majority of work on the subject has failed to engage with the political nature of decision making and how this influences the ways in which evidence will be used (or misused) within political areas. This book provides new insights into the

nature of political bias with regards to evidence and critically considers what an 'improved' use of evidence would look like from a policymaking perspective. Part I describes the great potential for evidence to help achieve social goals, as well as the challenges raised by the political nature of policymaking. It explores the concern of evidence advocates that political interests drive the misuse or manipulation of evidence, as well as counter-concerns of critical policy scholars about how appeals to 'evidence-based policy' can depoliticise political debates. Both concerns reflect forms of bias - the first representing technical bias, whereby evidence use violates principles of scientific best practice, and the second representing issue bias in how appeals to evidence can shift political debates to particular questions or marginalise policy-relevant social concerns. Part II then draws on the fields of policy studies and cognitive psychology to understand the origins and mechanisms of both forms of bias in relation to political interests and values. It illustrates how such biases are not only common, but can be much more predictable once we recognise their origins and manifestations in policy arenas. Finally, Part III discusses ways to move forward for those seeking to improve the use of evidence in public policymaking. It explores what constitutes 'good evidence for policy', as well as the 'good use of evidence' within policy processes, and considers how to build evidence-advisory institutions that embed key principles of both scientific good practice and democratic representation. Taken as a whole, the approach promoted is termed the 'good governance of evidence' - a concept that represents the use of rigorous, systematic and technically valid pieces of evidence within decision-making processes that are representative of, and accountable to, populations served.

The Politics of Friendship Aug 19 2021 Influential exploration of the idea of friendship and its political consequences. "O, my friends, there is no friend." The most influential of contemporary

philosophers explores the idea of friendship and its political consequences, past and future. Until relatively recently, Jacques Derrida was seen by many as nothing more than the high priest of Deconstruction, by turns stimulating and fascinating, yet always somewhat disengaged from the central political questions of our time. Or so it seemed. Derrida's "political turn," marked especially by the appearance of *Specters of Marx*, has surprised some and delighted others. In *The Politics of Friendship* Derrida renews and enriches this orientation through an examination of the political history of the idea of friendship pursued down the ages. Derrida's thoughts are haunted throughout the book by the strange and provocative address attributed to Aristotle, "my friends, there is no friend" and its inversions by later philosophers such as Montaigne, Kant, Nietzsche, Schmitt and Blanchot. The exploration allows Derrida to recall and restage the ways in which all the oppositional couples of Western philosophy and political thought—friendship and enmity, private and public life—have become madly and dangerously unstable. At the same time he dissects genealogy itself, the familiar and male-centered notion of fraternity and the virile virtue whose authority has gone unquestioned in our culture of friendship and our models of democracy. The future of the political, for Derrida, becomes the future of friends, the invention of a radically new friendship, of a deeper and more inclusive democracy. This remarkable book, his most profoundly important for many years, offers a challenging and inspiring vision of that future.

[The Politics of Fear](#) Sep 19 2021 *The Politics of Fear* traces the trajectory of far-right politics from the margins of the political landscape to its very center. It explores the social and historical mechanisms at play, and expertly ties these to the "micro-politics" of far-right language and discourse.

[The Politics of Resentment](#) Nov 09 2020 Since the election of Scott Walker, Wisconsin has been seen

as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from strong government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the “liberal elite.” Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate’s social identity matches our own. Using Scott Walker and Wisconsin’s prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. *The Politics of Resentment* shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself.

The Politics of the Asia-Pacific Jun 16 2021 This book introduces readers to the deep political tensions in the Asia-Pacific and offers classroom simulations designed to encourage students to delve deeper into the issues and dynamics of the region.

The Politics of Apolitical Culture Aug 07 2020 This book analyses a key episode in the cultural Cold War - the formation of the Congress for Cultural Freedom. Whilst the Congress was established

to defend cultural values and freedom of expression in the Cold War Struggle, its close association with the CIA later undermined its claims to intellectual independence or non-political autonomy. By examining the formation of the Congress and its early years of existence in relation to broader issues of US-European relations, Giles Scott-Smith reveals a more complex interpretation of the story. *The Politics of Apolitical Culture* provides an in-depth picture of the various links between the political, economic and cultural realms which led to the Congress.

Jun 04 2020

The Politics of Horror Jan 24 2022 *The Politics of Horror* features contributions from scholars in a variety of fields—political science, English, communication studies, and others—that explore the connections between horror and politics. How might resources drawn from the study of politics inform our readings of, and conversations about, horror? In what ways might horror provide a useful lens through which to consider enduring questions in politics and political thought? And what insights might be drawn from horror as we consider contemporary political issues? In turning to horror, the contributors to this volume offer fresh provocations to inform a broad range of discussions of politics.

The Politics of Human Life Oct 01 2022 This book centres on the notion of human life that lies at the foundation of contemporary thinking in the areas of ethics, law and politics. Centrally, the book addresses the deep divide, characteristic of this thinking, between: on the one hand, those who wish to do away with any anthropological understandings of the human, and appeal to mere facts delivered by science; and, on the other hand, critics who defend an anthropological understanding of human life that is tied to traditional, teleological, metaphysics. In short: knowledge of the world is given over to the sciences and moral theory is considered to operate in a distinct, and insulated,

domain. But this opposition has, Piergiorgio Donatelli argues here, outlived its usefulness. Through a discussion of the intimate human spheres of reproduction, dying and sexuality, he argues that we now live in a world characterized by new ways of living: by novel rearrangements of emotions, and by the modification, and in some cases a radical rupture in, existing ideas of human life. These shifts challenge any established separation between facts and norms, between human life and its conceptualization. As such, it is argued here, they simultaneously offer the possibility of a new, socially articulated, understanding of the relationship between subjectivity and normativity. Engaging pressing contemporary themes, this book will be invaluable to scholars in the fields of ethics, law and political theory, and both analytic and continental philosophy.

The Politics of a Disillusioned Europe Apr 14 2021 Moving from the fall of the Berlin Wall in 1989 to the present day, this book traces the trajectory of the six East Central European former satellites of the Soviet Union (Poland, Hungary, the Czech Republic, Slovakia, Romania, Bulgaria) that have joined the European Union. It seeks in particular to explain these countries' disenchantment with the "return to Europe" in spite of their significant advances. The book proceeds country by country and then devotes chapters to some contemporary issues, such as minorities, migration, and the relations of these "new" members with the European Union as a whole. The book eschews theory and is intended for a general audience, including students at all levels in political science and history classes devoted to the EU and to contemporary Europe, and to an academic and practitioner audience interested in world affairs and the evolution of the European Union. The book strives to fill a persistent knowledge gap in the English-speaking world concerning East Central Europe, and to offer fresh insights about the region in the context of contemporary geopolitics.

The Politics of Knowledge. Apr 26 2022 Social scientists often refer to contemporary advanced societies as 'knowledge societies', which indicates the extent to which 'science', 'knowledge' and 'knowledge production' have become fundamental phenomena in Western societies and central concerns for the social sciences. This book aims to investigate the political dimension of this production and validation of knowledge. In studying the relationship between knowledge and politics, this book provides a novel perspective on current debates about 'knowledge societies', and offers an interdisciplinary agenda for future research. It addresses four fundamental aspects of the relation between knowledge and politics: • the ways in which the nature of the knowledge we produce affects the nature of political activity • how the production of knowledge calls into question fundamental political categories • how the production of knowledge is governed and managed • how the new technologies of knowledge produce new forms of political action. This book will be of interest to students of sociology, political science, cultural studies and science and technology studies.

The Politics and Science of Prevision Mar 14 2021 This book inquires into the use of prediction at the intersection of politics and academia, and reflects upon the implications of future-oriented policy-making across different fields. The volume focuses on the key intricacies and fallacies of prevision in a time of complexity, uncertainty, and unpredictability. The first part of the book discusses different academic perspectives and contributions to future-oriented policy-making. The second part discusses the role of future knowledge in decision-making across different empirical issues such as climate, health, finance, bio- and nuclear weapons, civil war, and crime. It analyses how prediction is integrated into public policy and governance, and how in return governance structures influence the making of knowledge about the future. Contributors integrate two analytical

dimensions in their chapters: the epistemology of prevision and the political and ethical implications of prevision. In this way, the volume contributes to a better understanding of the complex interaction and feedback loops between the processes of creating knowledge about the future and the application of this future knowledge in public policy and governance. This book will be of much interest to students of security studies, political science, sociology, technology studies, and International Relations.

Justice and the Politics of Difference Sep 07 2020 A landmark work of political theory on the central importance of group identity and cultural pluralism in political life *Justice and the Politics of Difference* challenges the prevailing reduction of social justice to distributive justice, critically analyzing basic concepts underlying most theories of justice such as impartiality, formal equality, and the unitary moral subjectivity. Drawing on the experiences and concerns of social movements created by marginalized and excluded groups, Iris Marion Young shows how democratic theorists fail to consider institutional arrangements for including people not culturally identified with white European male norms of reason and respectability. Basing her vision of the good society on the differentiated, culturally plural network of contemporary urban life, she argues for a principle of group representation in democratic publics and for group-differentiated policies. Danielle Allen's incisive foreword contextualizes Young's work and explains how debates surrounding social justice have changed since—and been transformed by—the original publication of the book.

The Politics of Chemistry Oct 28 2019 Nieto-Galan examines the political role of chemistry in twentieth-century Spain, enriching understandings of the relationship between science and power.

The Politics of Political Science Dec 11 2020 In this thought-provoking book, Paulo Ravecca presents a series of interlocking studies on the politics of political science in the Americas. Focusing mainly

on the cases of Chile and Uruguay, Ravecca employs different strands of critical theory to challenge the mainstream narrative about the development of the discipline in the region, emphasizing its ideological aspects and demonstrating how the discipline itself has been shaped by power relations. Ravecca metaphorically charts the (non-linear) transit from “cold” to “warm” to “hot” intellectual temperatures to illustrate his—alternative—narrative. Beginning with a detailed quantitative study of three regional academic journals, moving to the analysis of the role of subjectivity (and political trauma) in academia and its discourse in relation to the dictatorships in Chile and Uruguay, and arriving finally at an intimate meditation on the experience of being a queer scholar in the Latin American academy of the 21st century, Ravecca guides his readers through differing explorations, languages, and methods. *The Politics of Political Science: Re-Writing Latin American Experiences* offers an essential reflection on both the relationship between knowledges and politics and the political and ethical role of the scholar today, demonstrating how the study of the politics of knowledge deepens our understanding of the politics of our times.

Politics of Security Nov 29 2019 In this critique of security studies, with insights into the thinking of Heidegger, Foucault, Derrida, Levinas and Arendt, Michael Dillon contributes to the rethinking of some of the fundamentals of international politics developing what might be called a political philosophy of continental thought. Drawing on the work of Martin Heidegger, *Politics of Security* establishes the relationship between Heidegger's radical hermeneutical phenomenology and politics and the fundamental link between politics, the tragic and the ethical. It breaks new ground by providing an etymology of security, tracing the word back to the Greek *asphaleia* (not to trip up or fall down), and a unique political reading of *Oedipus Rex*. Michael Dillon traces the roots of desire for security to the metaphysical desire for certitude, and points out that our way of seeking

that security is embedded in 20th century technology, thus resulting in a global crisis. Politics of Security will be invaluable to both political theorists and philosophers, and to anyone concerned with international relations, continental philosophy or the work of Martin Heidegger.

The Politics of Public Sector Performance Oct 09 2020 It is widely believed that the state in developing countries is weak. The public sector, in particular, is often regarded as corrupt and dysfunctional. This book provides an urgently needed corrective to such overgeneralized notions of bad governance in the developing world. It examines the variation in state capacity by looking at a particularly paradoxical and frequently overlooked phenomenon: effective public organizations or 'pockets of effectiveness' in developing countries. Why do these pockets exist? How do they emerge and survive in hostile environments? And do they have the potential to trigger more comprehensive reforms and state-building? This book provides surprising answers to these questions, based on detailed case studies of exceptional public organizations and state-owned enterprises in Africa, Asia, the Caribbean, Latin America and the Middle East. The case studies are guided by a common analytical framework that is process-oriented and sensitive to the role of politics. The concluding comparative analysis develops a novel explanation for why some public organizations in the developing world beat the odds and turn into pockets of public sector performance and service delivery while most do not. This book will be of strong interest to students and scholars of political science, sociology, development, organizations, public administration, public policy and management.

The Politics of Court Scandal in Early Modern England Jan 30 2020 This is a detailed 2002 study of the political significance of the murder of Sir Thomas Overbury, 1613.

The Politics of Exile Mar 26 2022 "The most thought-provoking and refreshing work on Bosnia and

the former Yugoslavia in a long time. It is certainly an immense contribution to the broadening schools within international relations." Times Higher Education (THE). Written in both autoethnographical and narrative form, *The Politics of Exile* offers unique insight into the complex encounter of researcher with research subject in the context of the Bosnian War and its aftermath. Exploring themes of personal and civilizational guilt, of displaced and fractured identity, of secrets and subterfuge, of love and alienation, of moral choice and the impossibility of ethics, this work challenges us to recognise pure narrative as an accepted form of writing in international relations. The author brings theory to life and gives corporeal reality to a wide range of concepts in international relations, including an exploration of the ways in which young academics are initiated into a culture where the volume of research production is more valuable than its content, and where success is marked not by intellectual innovation, but by conformity to theoretical expectations in research and teaching. This engaging work will be essential reading for all students and scholars of international relations and global politics.

The Politics of Cultural Development Jul 18 2021 There is a growing recognition of the role that culture can play in sustainable development strategies. This development has generally been welcomed, but also raises a number of questions: What are the implications in policy and practice? Who are the most influential voices in promoting a global agenda for culture and development, and to what extent has the creation of new international policy instruments reflected a consensus? More fundamentally, what is meant by "culture" in these discussions and who has the power to give particular definitions political and legal authority? *The Politics of Cultural Development* seeks to provide a theoretically and historically informed response to such questions, illustrated by reference to case studies (including the European Union, the Caribbean and China). Particular attention is

paid to the formation of the UNESCO Convention on the Protection and the Promotion of the Diversity of Cultural Expressions, a landmark instrument in debates about culture and development. The book goes on to explore some of the practical implications that this international treaty is beginning to have for the ways that culture is (and is not) being integrated into contemporary development policy and practice. This book will be useful for students, academics and policymakers in the fields of international development, international relations, international political economy, cultural policy and cultural theory.

The Politics and Ethics of Contemporary Work May 28 2022 Bringing together leading international scholars within the fields of social and political theory and philosophy, this book explores how we should understand work and its role(s) in our lives and wider society. What challenges are posed by work in our changing economy and the new economic forms that are beginning to emerge, and how can we best address these challenges? In what ways do patterns of working, as well as work technologies, shape people's lives within and outside work, in particular their life opportunities and their social and natural environment? How might we organize—or seek to reorganize—workplaces so that the experience of work better reflects our shared ethical ideals and normative principles? This volume examines these vital questions in a comprehensive and systematic manner in order to provide much needed theoretical insight and practical guidance in reflecting on the nature, problems, and possibilities of work currently. This book will be of interest to undergraduate and postgraduate students and established academics in the areas of contemporary political theory and philosophy, social theory, legal philosophy, labour studies, the sociology of work, practical ethics, critical theory, and political activism.

The Politics of the Unpolitical Jul 30 2022 In this collection of fourteen essays, first published in

1943, Herbert Read extends and amplifies the points of view expressed in his successful pamphlet *To Hell with Culture*, which has been reprinted here. The 'politics of the unpolitical' are the politics of those who strive for human values and not for national or sectional interests. Herbert Read defines these values and demands their recognition as a solvent of social and cultural crises', and looks forward to the future with constructive vision. This book will be of interest to students of politics, history, and philosophy.

[How Ideas and Institutions Shape the Politics of Public Policy](#) Dec 31 2019 This Element provides a critical review of existing literature on the role of ideas and institutions in the politics of public policy with the aim of contributing to the study of the politics of public policy. Because most policy scholars deal with the role of ideas or institutions in their research, such a critical review should help them improve their knowledge of crucial analytical issues in policy and political analysis. The following discussion brings together insights from both the policy studies literature and new institutionalism in sociology and political science, and stresses the explanatory role of ideas and institutions.

The Politics of the Core Leader in China Aug 26 2019 This is the first full-length scholarly study of the Chinese 'core' leader and his role in the Chinese Communist Party's elite politics.

[The Politics of Survival](#) Jul 26 2019 In this provocative analysis of global politics, the anthropologist Marc Abélès argues that the meaning and aims of political action have radically changed in the era of globalization. As dangers such as terrorism and global warming have moved to the fore of global consciousness, foreboding has replaced the belief that tomorrow will be better than today. Survival, outlasting the uncertainties and threats of a precarious future, has supplanted harmonious coexistence as the primary goal of politics. Abélès contends that this political reorientation has

changed our priorities and modes of political action, and generated new debates and initiatives. The proliferation of supranational and transnational organizations—from the European Union to the World Trade Organization (WTO) to Oxfam—is the visible effect of this radical transformation in our relationship to the political realm. Areas of governance as diverse as the economy, the environment, and human rights have been partially taken over by such agencies. Non-governmental organizations in particular have become linked with the mindset of risk and uncertainty; they both reflect and help produce the politics of survival. Abélès examines the new global politics, which assumes many forms and is enacted by diverse figures with varied sympathies: the officials at meetings of the WTO and the demonstrators outside them, celebrity activists, and online contributors to international charities. He makes an impassioned case that our accounts of globalization need to reckon with the preoccupations and affiliations now driving global politics. *The Politics of Survival* was first published in France in 2006. This English-language edition has been revised and includes a new preface.

The Politics of Value Nov 21 2021 Introduction -- Value and the social division of labor -- Benefit corporations: reimagining corporate responsibility -- Slow Money: the value of place -- Value and the public sector -- Conclusion: comparing the three revaluation projects

The Politics of Governance Aug 31 2022 How do government arrangements emerge? When and how does individual agency turn into collective agency? How do sensory experiences of violence, instability, etc affect the configuration of governance arrangements? When, why, and how are governance arrangements institutionalized? This book seeks to contribute to a non-normative conceptualization of the emergence and transformation of government arrangements, and addresses the under-theorization of actors and agency in conventional governance theories. The editors and

contributors theorize the concept of governance more concretely by analyzing the key actors and arrangements that define states of governance across different places and by examining its performance and development in particular settings and time periods. Each contribution to the edited volume is based on a case-study drawn from Africa, though the book argues that the core issues identified remain the same across the world, though in different empirical contexts. The contributions also range across key disciplines, from anthropology to sociology to political science. This ground-breaking volume addresses governance arrangements, discusses how social actors form such arrangements, and concludes by synthesizing an actor-centered understanding of political articulation to a general theory of governance. Scholars across disciplines such as political science, development studies, African studies, and sociology will find the book insightful.
