Real Knockouts Jul 25 2022 Unprecedented numbers of American women are today learning how to knock out, maim, even kill men who assault them. From behind the scenes of gun ranges, martial arts dojos, fitness centers offering "Cardio Combat," and in padded attacker courses like "Model Mugging," Real Knockouts demonstrates how self-defense trains women out of the femininity that makes them easy targets for men's abuse. And yet much feminist thought, like the broader American culture, seems deeply ambivalent about women's embrace of violence, even in self-defense. Investigating the connection between feminist theory and a woman's balled fist, McCaughey found self-defense culture to embody, literally, a new kind of feminism, one that will change forever the way we think of gender politics, the female body, and feminism itself.

**Critical Social Work** Feb 20 2022 'Another important contribution to the growing literature on critical social work. It is on the cutting edge of thinking about social work and its goal of social change.' - Kate van Heugten, *Social Work Review* *Critical Social Work* starts from the premise that a central goal of social work practice is social change to redress social inequality. Taking a critical theoretical approach, the authors explore the links between personal and social change. They confront the challenges for critical social work in the context of pressures to separate the personal from the political and in responding to the impact of changes in the socio-political, statutory and global contexts of practice. *Critical Social Work* has been thoroughly revised to take into account recent social, economic and political developments. Coverage of theoretical frameworks has been substantially expanded and reflects current concerns such as evidence based practice and human rights. The causes of people's marginalisation and oppression are examined in relation to class, race, ethnicity, gender and other forms of social inequality. Case study chapters in the earlier edition on working with immigrants, Indigenous people, women, men, families, people with psychiatric disabilities and those experiencing loss and grief have been updated and revised. The second edition includes new case study chapters on disability, older people, children, rurality, and violence and abuse. *Critical Social Work* is an essential resource to inform progressive social work practice.

**Selection and Breeding Programs in Aquaculture** Jul 01 2020 Although aquaculture as a biological production system has a long history, systematic and efficient breeding programs to improve economically important traits in the farmed species have rarely been utilized until recently, except for salmonid species. This means that the majority of aquaculture production (more than 90 %) is based on genetically unimproved stocks. In farm animals the situation is vastly different: practically no terrestrial farm production is based on genetically unimproved and undomesticated populations. This difference between aquaculture and livestock production is in spite of the fact that the basic elements of breeding theory are the same for fish and shellfish as for farm animals. One possible reason for the difference is the complexity of reproductive biology in aquatic species, and special consideration needs to be taken in the design of breeding plans for these species. Since 1971 AKVAFORSK, has continuously carried out large scale breeding research projects with salmonid species, and during the latest 15 years also with a number of fresh water and marine species. Results from this work and the results from other institutions around the world have brought forward considerable knowledge, which make the development of efficient breeding programs feasible. The genetic improvement obtained in selection programs for fish and shellfish is remarkable and much higher than what has been achieved in terrestrial farm animals.

**Ride the Tiger** Feb 26 2020 Julius Evola's final major work, which examines the prototype of the human being who can give absolute meaning to his or her life in a world of dissolution • Presents a powerful criticism of the idols, structures, theories, and illusions of our modern age • Reveals how to transform destructive processes into inner liberation The organizations and institutions that, in a traditional civilization and society, would have allowed an individual to realize himself completely, to defend the principal values he recognizes as his own, and to structure his life in a clear and unambiguous way, no longer exist in the contemporary world. Everything that has come to predominate in the modern world is the direct antithesis of the world of Tradition, in which a society is ruled by principles that transcend the merely human and transitory. *Ride the Tiger* presents an implacable criticism of the idols, structures, theories, and illusions of our dissolute age examined in the light of the inner teachings of indestructible Tradition. Evola identifies the type of human capable of "riding the tiger," who may transform destructive processes into inner liberation. He offers hope for those who wish to reembrace Traditionalism.

**Consolidated B-32 Dominator Jun 24 2022** Over the years the B-32 has been described only in a small number of magazine articles and in a booklet that have generally given a superficial and incomplete account, maligning the bomber, fairly or not, as a mediocre design besieged with developmental problems and a lackluster combat record. Consolidated B-32 Dominator - The Ultimate Look: from Drawing Board to Scrapyard is the definitive description and appraisal of this neglected bomber's development, testing, manufacture, and combat experience. The author used company design and production information, flight and test evaluations, along with previously unexplored Flight Manuals and Consolidated-Vultee Erection and Maintenance Manuals. **Medieval Combat Jan 07 2021** "[A] remarkable how-to . . . offers freeze-frame instructions on medieval martial arts using swords, shields, poleaxes, daggers and wrestling" (Publishers Weekly). Written by German fencing master Hans Talhoffer in 1467, this book illustrates the intricacies of the medieval art of fighting, covering both the "judicial duel" (an officially sanctioned fight to resolve a legal dispute) and personal combat. Combatants in the Middle Ages used footwork, avoidance, and the ability to judge and manipulate timing and distance to exploit and enhance the sword's inherent cutting and thrusting capabilities. These skills were supplemented with techniques for grappling, wrestling, kicking and throwing the opponent, as well as disarming him by seizing his weapon. Every attack contained a defense and every defense a counterattack. Talhoffer reveals the techniques for wrestling, unarmored fighting with the long sword, poleaxe, dagger, sword and buckler, and mounted combat. This unparalleled guide to medieval combat, illustrated with 268 contemporary images, provides a glimpse of real people fighting with skill, sophistication and ruthlessness. This is one of the most popular and influential manuals of its kind. "This superb treatise, amply illustrated, provides valuable insight into the real world of medieval combat. Magnificent!" -Books Monthly
