Universiti Sains Malaysia, Sustainability and the Struggle for a Vital Centre in Education (Penerbit USM) Feb 21 2022 The agenda of Universiti Sains Malaysia (USM) aims to engage the problems of values and ethics in the context of knowledge production and teaching in universities. The essential argument of this monograph is the USM's educational philosophy is founded in an effort to overcome the problems of mental captivity and the degradation of values that accompanies neo-liberal influences on higher education. In this sense, USM is seeking to re-imbue the soul of higher education by articulating a normative 'vital centre' to the mission of USM. This normatively-based vital centre based on cultural respect, sustainability, and commitment to the bottom billions is the critical touchstone for reforming pedagogical practice in USM. Educational change is fundamentally based on the principles of social responsibility and inclusiveness. The USM agenda is fundamentally an effort to realize these values through educational transformation. Universiti Sains Malaysia, Penerbit Universiti Sains Malaysia

Religion and the Sciences of Origins (Agama dan Sains Asal-Usul) May 15 2021 Agama dan Sains Asal-Usul secara kritis mendiskusikan isu-isu dalam agama dan sains-sains asal-usul baik dalam konteks historis maupun kontemporer. Setelah mengembangkan pilihan-pilihan untuk hubungan antara sains dan kepercayaan—konflik, separasi, dan integrasi—buku ini mendiskusikan tiga peristiwa historis: revolusi saintifik, peristiwa Galileo, dan penerimaan tulisan Darwin Asal-Usul Spesies. Perhatian khusus diberikan kepada mitos yang berpengaruh namun menyesatkan tentang peperangan antara sains dan agama. Buku ini menyelidiki isu-isu teoretis—kebetulan dan tujuan, psikologi agama evolusioner, relasi antara pikiran dan tubuh (dan neurosains dan kehendak bebas), dan relasi antara Allah dengan kebaikan. Setelah mendiskusikan Allah dan Ledakan Besar, buku ini disimpulkan dengan analisis tentang evolusi dalam tradisi Muslim dan Yahudi. Buku ini, yang tidak mengasumsikan latar belakang sebelumnya dari pembaca, menawarkan wawasan-wawasan ke masa lalu yang krusial dan ke dalam perdebatan-perdebatan masa kini yang paling hangat seputar sains dan agama.

Sustaining APEX: Universiti Sains Malaysia's Mission to Transform Higher Education (Penerbit USM) Mar 25 2022 The monograph 'Sustaining APEX: Universiti Sains Malaysia's Mission to Transform Higher Education' seeks to expand on and elaborate themes found in the previous two monographs in our Intellectual Discourse Series. In this monograph, we also take a deeper look at the problems of values and national development as well as issues of legitimacy and the efficacy of change and transformation in conditions of complex globalization. This monograph seeks to engage the difficult issues around science and technology and values, the social legitimacy of reform, and addresses the issues of newness, reputation, ranking and the problems of leadership. In doing this, we hope to tease out more of the implications of USM's reform agenda and locate discussions of it within a broader discourse of globalization and its vicissitudes. The essential argument made in this monograph is that USM's transformation agenda is a direct challenge to contemporary neo-liberal project for higher education. USM's agenda entails a fuller idea and engagement with the educational and ethical mission of the university. Ecological sustainability, scientific and technological advancement as well as the sustainability of Malaysian culture, values, and sense of social justice is central to the mission of USM. Seeking to advance these in the current conditions of globalization and ensuring continued legitimacy for this project within such an environment is the challenge ahead.
