*Honour Killing in the Second Decade of the 21st Century* Aug 28 2019 Honour killing is considered the worst form of domestic violence against human beings, particularly against women. It is clear that societies across the world - through their laws and their courts - continue to countenance legal defences which overwhelmingly benefit males committing violence against females. Despite the statistics that honour killings are being reported from all over the world, the greatest number of shocking reports of honour killings come from Muslim countries. Unfortunately, Pakistan is among those countries where women are facing various forms of violence in the name of religion,

customs and traditions, and cases of honour killing are regularly reported there. It is imperative to understand and see killings in the name of honour from the perspective of those who have been directly affected by the socio-religious cultural norms which condone them. The findings gathered here show that honour killing is not only family or community violence or a tradition to preserve honour, but that behind these killings ulterior purposes are being served and therefore the number of the killings is increasing every year in Pakistan. This book will allow the reader to understand precisely the menace of honour killing and to consider how it can be addressed to save innocent lives and to stop these severe violations of human rights.

**Assessment and Teaching of 21st Century Skills** Jun 18 2021 This book provides a detailed description of research and application outcomes from the Assessment and Teaching of 21st Century Skills project, which explored a framework for understanding the nature of these skills. The major element of this new volume is the presentation of research information from the global assessment of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. The outcomes presented include evidence to support the validity of

assessment of 21st century skills and descriptions of consequent pedagogical approaches which can be used both to teach the skills and to use them to enhance key learning goals in secondary education systems. The sections of the volume are connected through a focus on the degree to which innovative assessment tasks measure the constructs of interest. This focus is informed by conceptual and methodological issues associated with affordances of 21st century computer-based assessment. How understanding of the nature of the skills, as derived from these assessments, can guide approaches to the integration of 21st century skills in the classroom, is informed by initiatives adopted by participating countries. The guiding questions in this volume are: "Do the assessment tasks measure the constructs?" and "What are the implications for assessment and teaching in the classroom?" It is the third volume of papers from this project published by Springer.

**The Second World War in the Twenty-First-Century Museum** Apr 28 2022 The Second World War is omnipresent in contemporary memory debates. As the war fades from living memory, this study is the first to systematically analyze how Second World War museums allow prototypical visitors to comprehend and experience the past. It analyzes twelve permanent exhibitions in Europe and North America - including the Bundeswehr Military History Museum in Dresden, the Museum of the Second World War in Gdańsk, the House of European History in Brussels, the Imperial War Museums in London and Manchester, and the National WWII Museum in New Orleans - in order to show how museums reflect and shape cultural memory, as well as their cognitive, ethical, emotional, and aesthetic potential and effects. This includes a discussion of representations of events such as the Holocaust and air warfare. In relation to narrative, memory, and experience, the study develops the concept of experientiality (on a sliding scale between mimetic and structural forms), which provides a new textual-spatial method for reading exhibitions and understanding the experiences of historical individuals and

collectives. It is supplemented by concepts like transnational memory, empathy, and encouraging critical thinking through difficult knowledge.

*Social Class in the 21st Century* Mar 28 2022 A fresh take on social class from the experts behind the BBC's 'Great British Class Survey'. Why does social class matter more than ever in Britain today? How has the meaning of class changed? What does this mean for social mobility and inequality? In this book Mike Savage and the team of sociologists responsible for the Great British Class Survey look beyond the labels to explore how and why our society is changing and what this means for the people who find themselves in the margins as well as in the centre. Their new conceptualization of class is based on the distribution of three kinds of capital - economic (inequalities in income and wealth), social (the different kinds of people we know) and cultural (the ways in which our leisure and cultural preferences are exclusive) - and provides incontrovertible evidence that class is as powerful and relevant today as it's ever been.

**A Concise Handbook of the Indian Economy in the 21st Century, Second Edition** May 18 2021 After a phase of slow growth post Independence, the Indian economy has experienced significant changes since the mid-1980s as a result of major reforms. India's growth story has defied established economic patterns and, in the process, created interesting paradoxes that have attracted global attention. In this new edition of A Concise Handbook of the Indian Economy in the 21st Century, select chapters from the original have been updated to present a brief but comprehensive overview of the Indian economy, contributing to a finer understanding of India's economic development. The volume adopts a non-ideological and forward-looking approach to discuss important economic issues. It takes into account various social and political factors impacting the Indian economy, and compares the importance of external market factors with that of domestic reforms in India's economic growth. The book aims to provide a deep understanding of the economy based on careful fact-based research, which is a pre-requisite for formulating pragmatic reforms necessary to achieve sustained and inclusive growth.

**Living Vatican II** Dec 13 2020 Part memoir, part history of the Church during one of her most exciting and controversial periods, this memorable book by eminent theologian Gerald O'Collins tells the story of the aftermath of Vatican II and how it affected him personally. He explores the work of some institutions in Rome and elsewhere towards implementing the teaching and decisions of Vatican II; the guidelines provided by a fourth-century example of creative fidelity in receiving conciliar teaching; the liturgical renewal after Vatican II;

the reception of the Council's moral teaching; his own postconciliar relations with other Christians and with other believers; and the impact of Vatican II on theology. Finally, O'Collins offers suggestions about the future of the Church. "But what did the Council do for me personally--as a Catholic Christian and a Jesuit priest?" The author's highly personal approach in answering this and other questions makes for a compulsively readable book that illuminates the workings of the Church as the mind of one of the leading theologians of the 20th century.

**China in Ten Words** Jan 14 2021 From one of China's most acclaimed writers, his first work of nonfiction to appear in English: a unique, intimate look at the Chinese experience over the last several decades, told through personal stories and astute analysis that sharply illuminate the country's meteoric economic and social transformation. Framed by ten phrases common in the Chinese vernacular—"people," "leader," "reading," "writing," "Lu Xun" (one of the most influential Chinese writers of the twentieth century), "disparity," "revolution," "grassroots," "copycat," and "bamboozle"—China in Ten Words reveals as never before the world's most populous yet oft-misunderstood nation. In "Disparity," for example, Yu Hua illustrates the mind-boggling economic gaps that separate citizens of the country. In "Copycat," he depicts the escalating trend of piracy and imitation as a creative new form of revolutionary action. And in "Bamboozle," he describes the increasingly brazen practices of trickery, fraud, and chicanery that are, he suggests, becoming a way of life at every level of society. Characterized by Yu Hua's trademark wit, insight, and courage, China in Ten Words is a refreshingly candid vision of the "Chinese miracle" and all its consequences, from the singularly invaluable perspective of a writer living in China today.

**The Challenge of the 21st Century** Jul 28

2019 The population and technology explosions are shrinking the world to a system in which everything is interactive, forcing us to transcend traditional modes of thinking. In this book, the authors set forth the concept of multiple perspectives: technical, organizational, and personal. They begin the book with a multiple-perspective examination of the Exxon Valdez oil spill in Alaska, a case that foreshadows the intensifying problem of managing hazardous technology in the coming decades. They then apply this approach, on a much larger scale, to the United States in the evolving global setting. Included in the discussion are issues such as the balance between short-term and long-term concerns and between individual and societal responsibilities. The interdependence and inseparability of the three perspectives is reflected in the focus on technological superiority, organizational rethinking, and imaginative personal leadership. This book will help managers and students in business, engineering, science, and policymaking break away from exclusive concern with the technical perspective and thus help prepare them for the challenges of a new era.
