The EU and Human Rights Dec 27 2019 For all its achievements in integrating Europe, the EU lacks a human rights policy which is coherent, balanced and professionally administered. Whether in relation to access to Community justice, sex equality, race and disability discrimination, or policing, or in its external policies from Kosovo to China, the Union needs new principles, procedures and institutions to design and implement an effective set of human rights policies. The introduction of a single currency, the problems of racism and xenophobia, the need for a humane refugee policy, the growing powers of the EU in many fields, and the Unions imminent eastward expansion, all make it urgent to adopt such policies. In this volume the leading experts in the field, including individuals from every EU country, provide an insightful critique of current policies and detailed recommendations for the future. The volume includes comprehensive analyses of: the competencies of the EU in human rights, access to justice, the Third Pillar,

Young People in Risk Society: The Restructuring of Youth Identities and Transitions in Late

Modernity Sep 03 2020 This title was first published in 2002: Loosely divided into two sections, this book's first part includes chapters which explore young people's identities and youth cultures in relation to issues such as drug use, education and dance music. In various ways, the authors examine whether there is a need to rethink the existing theories and concepts which have informed the study of youth cultures and identities. The second part to the volume is concerned with how young people experience "transitions", in relation to such topics as employment, sexuality, and household formation. The chapters also raise theoretical questions on the usefulness of the transition concept in late modernity, illustrating how the reshaping of key institutions in late modernity has had a profound effect on the sorts of transitions young people make today. In addressing such issues the authors examine the potential contribution that concepts around risk and risk society and new Third Way social policy initiatives can have to contemporary youth studies.

Yearbook of Morphology 1998 May 31 2020 A revival of interest in morphology has occurred during recent years. The Yearbook of Morphology series, published since 1988, has proven to be an eminent support for this upswing of morphological research, since it contains articles on topics which are central in the current theoretical debates which are frequently referred to. The Yearbook of Morphology 1998 focuses on two issues: the position of inflection in the grammar, and the interaction of morphology with phonology, in particular the problem of allomorphy. In addition, this volume presents a study of the relation between transposition and argument structure, a declarative model of word formation applied to conversion in German, an analysis of Dutch verbal compounds and a study of the semantic aspects of nominalization. The relevant evidence comes from a wide variety of languages. Theoretical, descriptive, and historical linguists, morphologists, phonologists, and psycholinguists will find this book of interest.

The Nebi Yearbook 1998 Jul 26 2022 Thorvald Stoltenberg Ambassador Chairman of the Editorial Advisory Board Most of us have been overwhelmed by the speed and extent of the changes that have been taking place in Europe since the late 1980s. Over the span of a few years, we have witnessed the collapse of the Soviet Union and the unification of Germany. This process has had far-reaching implications for Northern Europe: the Baltic states have attained independence, and with the establishment of the Baltic Sea regional co-operation and the Barents co-operation, a new type of East-West relations has come into being. The process of change continues. Its latest manifestation is the agreement between Russia and NATO, and NATO and EU enlargement is expected to take place over the next few years. With such far-reaching transformations, we need to reflect on what is happening. We need a more coherent picture of the new situation in Northern Europe and of where we are heading. This Yearbook is an attempt to fulfil this need. I would like to thank the editors for taking this initiative, which has been long awaited by those of us who have been actively interested in the improved relations between the former East and the old West that have been made possible by the end of the Cold War - and particularly in the new opportunities for cross-border co-operation and integration in the North European and Baltic space.

Trade Unions in Western Europe since 1945 Feb 27 2020 The Societies of Europe is an 8-title series of historical data handbooks and accompanying CD-ROM sets, on the development of Europe from the nineteenth to the twentieth century. The series is a product of the Mannheim Centre for Social research, a body dedicated to comparative research on Europe and one of the leading social research institutes in the world. It is a collection of datasets giving a clear and systematic study of long term developments in European society. The data is presented statistically and is clearly comparative. The Societies of Europe is the most comprehensive data series available on Western European social issues. Each book is accompanied by a CD-ROM containing data sets not included in the text enabling users to manipulate the data as wanted. Information is available in different programmes (Excel, SPSS and SAS) and in data structures for analysis, viewing and building time series. This comparative data handbook offers an empirical base to a long-term and comparative understanding of changes and variations in European union movements. It provides information on the context and history of union development, the changes in the structure of post-war unionism until today, the long-term trends in union membership and union density, and the shifts in the cross-sectional composition of union membership. This book and CD-ROM are the result of many years of research by the authors in collaboration with an international research team, and provides an original source for comparative and national studies or individual enquiries. The country and comparative tables offer cross-checked and often newly-calculated statistics on national union organizations and their membership series. The CD-ROM includes selected tables from the handbook and provides additional databases with organizational data and membership series of major national and European union organizations.

Immigration and Politics in the New Europe Aug 03 2020 With almost a quarter of the world's migrants, Europe has been attempting to regulate migration and harmonize immigration policy at the European level. The central dilemma exposed is how liberal democracies can reconcile the need to control the movement of people with the desire to promote open borders, free markets and liberal standards. Gallya Lahav's book traces ten years of public opinion and elite attitudes toward immigration cross-nationally to show how and why increasing EU integration may not necessarily lead to more open immigration outcomes. Empirical evidence reveals that support from both elite and public opinion has led to the adoption of restrictive immigration policies despite the requirements of open borders. Unique in bringing together original data on European legislators and national elites, longitudinal data on public opinion and institutional and policy analyses, this 2004 study provides an important insight into the processes of European integration, and globalization more broadly.

Russia as a Great Power Jan 26 2020 After a period of relative weakness and isolation during most of

the 1990s, Russia is again appearing as a major security player in world politics. This book provides a comprehensive assessment of Russia's current security situation, addressing such questions as: What kind of player is Russia in the field of security? What is the essence of its security policy? What are the sources, capabilities and priorities of its security policy? What are the prospects for the future? One important conclusion to emerge is that, while Russian foreign policy under Putin has become more pragmatic and responsive to both problems and opportunities, the growing lack of checks and balances in domestic politics makes political integration with the West difficult and gives the president great freedom in applying Russia's growing power abroad.

Judicial Dis-Appointments Oct 05 2020 In 2009 and 2010, the European Court of Justice and the European Court of Human Rights underwent significant reforms to their respective judicial appointments processes. Though very different judicial institutions, they adopted very similar - and rather remarkable - reforms: each would now make use of an expert panel of judicial notables to vet the candidates proposed to sit in Luxembourg or Strasbourg. Once established, these two vetting panels then followed with actions no less extraordinary: they each immediately took to rejecting a sizable percentage of the judicial candidates proposed by the Member State governments. What had happened? Why would the Member States of the European Union and of the Council of Europe, which had established judicial appointments processes that all but ensured themselves the unfettered power to designate their preferred judges to the European courts, and who had zealously maintained and exercised that power over the course of some fifty years, suddenly decide to undermine their own capacity to continue to do so? This book sets out to solve this mystery. Its point of departure is that it would be a mistake to view the 2009-2010 establishment of the two vetting panels in isolation from other European judicial developments. Though these acts of institutional creation are certainly the most notable recent developments, they actually represent but the crowning achievement of a process of European judicial appointments reform that has been running unremittingly since the 1990's. This longstanding and tenacious movement has actually triggered a broad set of interrelated debates and reforms, encompassing not only judicial appointments per se, but also a much wider set of issues, including judicial independence, judicial quality, judicial councils, the separation of powers, judicial gender equity, and more.

Post-Cold War Identity Politics Sep 23 2019 During the past decade northern Europe has started to assume an identity of its own. Categories of East and West have become blurred, challenging as well the idea of what it means to be Nordic. Post-Cold War Identity Politics maps this process in Scandinavia. Looking at projects designed to help regional development in the Nordic countries, it assesses whether a new way of defining 'Northern-ness' is emerging. The book highlights the existence of co-existing and - to

some extent - competing region-building projects in northern Europe. It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change, and points to how they might develop in the future.

The Finnish Yearbook of International Law 1998 Dec 07 2020 Despite its Finnish initiative and pedigrees, "The Finnish Yearbook of International Law" does not restrict itself to purely Finnish' topics.
