Air Entrainment in Free-surface Flow Aug 01 2020 This monograph is aimed at the practising hydraulic engineer. Work on it commenced at Professor Naudascher's instigation in 1982. Over the next six years all or some of the authors discussed progress at IAHR sponsored conferences at Esslingen, Melbourne, Lausanne and Beijing. With the authors scattered throughout the world, and all with other responsibilities, progress was bound to be slow. Completion was further delayed by the great increase in published technical literature in this area over the period 1982-1988. This literature continues to expand and with it our understanding of the air water flow phenomena. The monograph must therefore be seen as the authors' views on the state of the art around 1988. More recent references have been included for completeness. This monograph has been a joint effort with most authors making suggestions and contributions to more than one chapter. Nevertheless, the chapter authors are primarily responsible for the material in their chapters. Throughout the monograph symbols are defined when they are first introduced and a list of symbols is included at the end of each chapter. Many other people have contributed to this monograph, but the authors would particularly like to acknowledge the assistance given by Professor John McNown who has read, commented on and improved the style of the complete monograph.

spectrum of practice lineages that existed in Tibet. In its eighteen volumes, Kongtrul brings together some of the most important texts on key topics of Buddhist thought and practice as well as authoring significant new sections of his own. In this, the eighteenth volume, Kongtrul expands on The One Hundred and Eight Guidebooks, a collection of teaching manuals compiled by the sixteenth-century Tibetan master Kunga Drolchok, adding Indic source texts, Tibetan antecedents, and later interpretations. Though compiled by a Jonangpa abbot and transmitted by the Jonang tradition, these teaching manuals are actually drawn from the Kadam, Sakya, Kagyu, and, to a lesser extent, Nyingma traditions. They are succinct and impart practical wisdom, as transmitted by key figures like Kunga Chogdrub and Lowo Khenchen Sonam Lhundrub. Gyurme Dorje, the translator, provides extensive notes and helpful context throughout. The resulting volume preserves and integrates the diverse lineages of Tibetan Buddhism while providing useful advice to practitioners.

[Baptism and the Baptists](#) Apr 21 2022 Since its first publication in 2000, *Baptism and the Baptists* has become the definitive work on the subject. It examines the theology and practice of believers' baptism among twentieth-century Baptists associated with the Baptist Union of Great Britain, and identifies the major influences which have led to its development. In the nineteenth and early twentieth century, the majority of Baptists concentrated predominantly on the mode and subjects of baptism (immersion and believers), understanding the rite merely as an ordinance--the believer's personal profession of faith in Christ. However, in continuity with a tradition of Baptists going back as far as the first Baptists in the second and third decades of the seventeenth

century, there were also a significant number of ministers and scholars who saw the inadequacy of this view of baptism both biblically and theologically. This sacramental view developed and grew throughout the twentieth century, and influenced a resurgence of baptismal sacramentalism in the early twenty-first century among Baptists not just in Britain, but also in North America, Europe, and further afield.
