Great Leaders Have No Rules Feb 23 2022 As a serial entrepreneur, Kevin Kruse has seen time and again that the leadership practices that actually work are the opposite of what is commonly taught and implemented. Close Your Open Door Policy shows how a contrarian approach can be a better, faster, and easier way to succeed as a leader. Chapter by chapter, Kruse focuses on a piece of popular wisdom, then shows with real-world case studies and quantitative research that the opposite approach will lead to better results, encouraging leaders to play favorites, stay out of meetings, and, of course, close their open doors.

Energy Efficiency in Household Appliances and Lighting Nov 22 2021 Household appliances encompass a large variety of equipment including the cold appliances (refrigerators and freezers), the wet appliances (washing machines, dishwashers and dryers), the space conditioning appliances (heaters, air conditioners, heat pumps, fans, boilers), the water heaters, the cooking appliances, a wide array of consumer electronics (such as TVs, VCRs, HiFi systems) and miscellaneous small appliances (such as vacuum cleaners, irons, toasters, hairdryers and power tools). Household appliances save a large amount of domestic labour to perform the household tasks, as well as provide comfort conditions and convenience to the household occupants. The European Community SAVE Programme has promoted the efficient use of energy, in particular in domestic appliances. SAVE has sponsored a variety of studies to characterise the use of the main household appliances and lighting and to identify cost-effective technical options to improve the energy efficiency, as well as to identify the strategies to promote the penetration of efficient equipment in the market place. National energy agencies, independent experts and appliance manufacturers have participated in the SAVE activities and have done a remarkable job. While the energy efficiency of the main household appliances has been improved, at the same time it was possible in most cases to improve the appliance performance, reliability and quality of service.

LEED® for Homes-- Pilot Study Jun 05 2020 Army participation in the LEED(registered name) for Homes Pilot Program is intended to facilitate preparations and transition from SPiRiT to LEED for Homes as soon as it is ready for adoption. The pilot program will coincide with U.S. Green Building Council (USGBC) development of the LEED for Homes evaluation tool. The Office of the Assistant Chief of Staff (Installation Management) Housing Division has overall responsibility for the transition and has selected Norfolk District, Center of Standardization for Family Housing to facilitate and coordinate participation in the LEED for Homes Pilot Program. A team consisting of Army personnel experienced in Army Family Housing (AFH) and/or sustainability conducted site visits to AFH at Fort Lee, VA and Fort Huachuca, AZ. Both installations have a history of successful AFH projects and current projects under construction that used SPiRiT as a sustainability rating tool. LEED for Homes was applied to each AFH project. Further, each credit was evaluated for applicability to Army projects and its ease of application using current design guidelines. Where appropriate, feedback was provided to the USGBC regarding issues, concerns, or clarifications on particular credits. The team also defined several Innovation and Design credits that could universally apply to AFH projects.

Environmental Information in Instructions for Use of Consumer Products Oct 02 2022 The European Union has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy, IPP. Accordingly, consumers should have easy access to understandable, relevant and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on, examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and 'eco-development' of instructions for use.

Can God Write a Book? Mar 15 2021 In the beginning was the Word, and the Word was with God, and the Word was God. He was in the beginning with God (Jn 1:1-2 ESV). Amazing! The Word that is God. The Word that became a man. Not an autobiography or a biography. A book that tells of a man before He was born. How He will come (Is 9:6). What He will do (Ps 107:20). And how He will die (Is 53:12). The Word that came alive and lived among us (Jn 1:14). The Word is Emmanuel. God with us. Can God write a book? Scriptures that let us know that He can and He did.
