TESOL and Sustainability May 06 2020 In the burgeoning field of ecolinguistics, little attention has been given to the ways in which English language teaching is and has become implicated in global ecological crises. This book begins a dialogue about the opportunities and responsibilities presented to the TESOL field to re-orient professional practice in ways that drive cultural change and engender alternate language practices and metaphors. Covering a diverse range of topics, including anthropogenic climate change, habitat loss, food insecurity and mass migration, chapters argue that such crises require not only technological innovation, but also cultural changes in how human beings relate to each other and their environment. Arguing that it is incumbent upon the field of English language teaching to reckon with such cultural changes in how and what we teach, TESOL and Sustainability addresses the ways in which discourses such as eco-pedagogy, the critique of neo-liberalism, non-Western philosophy and post-humanist thought can and must inform how and what is taught in ESL and EFL classrooms.

Fun And Excitement With RC Cars Sep 09 2020 Knowing about RC cars is very essential before stepping into the racing world. If you are still an amateur, you might crib on the fact that you aren't able to choose the best electric powered RC car. You need an assistance to choose the best suitable car to pose against your rivals and this isn't easy as it might sound. Electric RC cars are the ones which run on batteries. The electric

batteries are in the form of battery packs. You have a choice while choosing the battery. The 'ready to run' or the batteries which you need to build it yourself are available. The 'ready to run' batteries are preferred as the work load becomes very minimal. Nitro RC cars are the ones which are tougher to maintain and they are quite expensive. RC cars that run on battery packs are easier to purchase. It is specifically designed for amateurs or beginners. However, RC car fanatics who are quite experienced use these cars for variety and comparison purposes. RC electric cars are user-friendly and they are available cheap in the market. This is their main advantage. The difference between the prices of a gasoline powered RC car and an electric RC car goes up to a hundred dollars.

The Green Teen Jan 02 2020 Jenn Savedge's book is packed with tips that teens can easily do to green up the world that they inhabit. There are also a few more challenging actions (like starting a school recycling program) for those ready to take their environmentalism up a notch. Jenn has done an impressive job creating a straightforward, well-organized reference book full of tips, resources and advice for eco-friendly teens. She not only explains the how's of going green; she explains the why's too, and helps teens to understand the importance of the part they can play in caring for the planet. - Robin Shreeves, Mother Nature Network Today's teenagers are standing at the crossroads of environmental history. Global warming will fundamentally change the world as they know it within their lifetime. But how to keep their healthy environmental awareness from becoming environmental anxiety? The secret is to provide them with education and tools for positive action. Written in easily accessible language, *The Green*

Teen combines simple and quick eco-friendly tips, interviews with “green teens,” ideas for organizing and communicating environmental change, and a host of resources in a handy “grab-and-go” format. Teens will learn: How the choices they make each day impact the environment How to fit eco-friendly decisions into their tight schedules and budgets How to effectively get today’s decision makers involved in environmental stewardship Teens want to learn how to minimize their environmental impact at home, at school, and in their communities and get their concerns recognized by school officials, politicians, media, and even their own parents. The Green Teen is the book that will help them do it, and it is also a must-read for parents, grandparents, teachers, and school administrators who want to help the next generation make environmentally responsible choices. Jenn Savedge is the author of The Green Parent: A Kid-Friendly Guide to Earth-Friendly Living, an avid environmentalist, and a recognized authority and frequent speaker on reducing the environmental impact of the family. Her articles have appeared in national print and on-line media, www.thegreenparent.com.
