Reference Manual on Scientific Evidence has been relied upon in the legal and academic communities and is often cited by various courts and others. Judges faced with disputes over the admissibility of scientific and technical evidence refer to the manual to help them better understand and evaluate the relevance, reliability and usefulness of the evidence being proffered. The manual is not intended to tell judges what is good science and what is not. Instead, it serves to help judges identify issues on which experts are likely to differ and to guide the inquiry of the court in seeking an informed resolution of the conflict. The core of the manual consists of a series of chapters (reference guides) on various scientific topics, each authored by an expert in that field. The topics have been chosen by an oversight committee because of their complexity and frequency in litigation. Each chapter is intended to provide a general overview of the topic in lay terms, identifying issues that will be useful to judges and others in the legal profession. They are written for a non-technical audience and are not intended as exhaustive presentations of the topic. Rather, the chapters seek to provide judges with the basic information in an area of science, to allow them to have an informed conversation with the experts and attorneys.

Northrop F-89 Scorpion Pilot's Flight Operating Manual Sep

21 2019 The F-89 Scorpion was the first multi-seat, all-weather jet interceptor in the U.S. Air Force. It also became the first aircraft ever equipped with a nuclear air-to-air weapon – the 1.5 kiloton Genie missile. The F-89 made its debut in 1948, joined the Air Force in 1950, and then served as the mainstay of Air Defense Command for 17 years. Over 1,000 F-89s were produced.

including 350 of the F-89 model equipped with pylons to carry the Genie. (One F-89 did fire the missile as part of Operation Plumbob in 1957.) Originally printed by Northrop and the USAF, this F-89 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified 'Restricted', the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.
