Computational Materials Science Aug 22 2019 The goal of this collection was to gather together up-to-date knowledge from researchers in academia and industry, as well as end-users, and also give them the opportunity to share ideas, problems and solutions related to the divers aspects of Computational Materials Science, Mechanical, Industrial and Manufacturing Engineering. The result is an up-to-date survey which should be essential reading for those interested in thesetopics. Volume is indexed by Thomson Reuters CPCI-S (WoS).

Selective Service Law Reporter Nov 17 2021

Demand response in the Nordic electricity market Dec 19 2021 The report provides input to a Nordic strategy on how to address consumer flexibility in a cost-efficient manner. The main recommendation is to focus on increased market efficiency in general and not promote specific measures on the demand side unless market failures are identified. Even so, it's recommended that standard data formats on price signals to small consumers should be further assessed.

High Assurance Services Computing Jun 24 2022 Service computing is a cutting-edge area, popular in both industry and academia. New challenges have been introduced to develop service-oriented systems with high assurance requirements. High Assurance Services Computing captures and makes accessible the most recent practical developments in service-oriented high-assurance systems. An edited volume contributed by well-established researchers in this field worldwide, this book reports the best current practices and emerging methods in the areas of service-oriented techniques for high assurance systems. Available results from industry and government, R&D laboratories and academia are included, along with unreported results from the "hands-on" experiences of software professionals in the respective domains. Designed for practitioners and researchers working for industrial organizations and government agencies, High Assurance Services Computing is also suitable for advanced-level students in computer science and engineering.
