**Product Strategy and Corporate Success**

Nov 17 2021 Product strategy is the key driver of business strategy and corporate success. This book brings out several important aspects of product strategy, drawing upon examples from the Indian automobile industry, which is verily the bellwether of the Indian economy. The automobile industry is not only a strategic industry economically but also an instructive industry intellectually. The industry is the cradle of modern management and is a synthesis of various functional strategies. The growth of the automobile industry or, for that matter, any consumer-facing industry lies in its ability to maintain a continuous pipeline of new and innovative products, substantive in functionality and stylistic in appearance. The automobile industry provides the perfect backdrop for discussing products as the core of the corporate business strategy. The global automobile industry, including the Indian automobile industry, is at an inflection point with portends of an unprecedented transformation. The drivers of this transformation are already seen in terms of connected vehicles, autonomous mobility, electric vehicles and digital technologies. The book, through its eighty chapters, demonstrates the synergistic interplay between technology and business, strategy and execution, innovation and inventiveness, enterprise and regulation, indigenization and globalization, structure and process, resourcing and spend, and leadership and management. This interplay would determine India's ability to become a major player in this transformation. This book will be of interest to industry professionals, policy makers, the academic community and the general public.

**On a Global Mission: The Automobiles of General Motors International Volume 3**

Oct 24 2019 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and

supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.
