Approach of ICT in Education for Rural Development Dec 17 2021 A comprehensive study on the importance of ICT in rural education There are many challenges faced in effective Information and Communication Technology (ICT) implementation for rural development. This book contains policy recommendations to help drive and stimulate innovation and creativity through ICT use and reduce the digital divide and social exclusion in rural areas. The cases included in this book typically represent the ICT educational applications in China and developing countries and examine how current policies can support the overall development progress. It is expected to share good practices and to focus on spreading them better among three targeted groups of people: young people in rural areas, teachers at rural primary and high schools, and "left-behind" rural women. This book is a research result of the program "The Information and Communication Technology (ICT) in Education for Rural Development (IERD)" that was initiated in 2012 by the UNESCO International Research and Training Centre for Rural Education (INRULED) along with its three other partners—UNESCO Sector Policy Advice (UNESCO-PAD) and ICT in Education, International Institute for Capacity Building in Africa (IICBA), and Beijing Normal University-R&D Centre for Knowledge Engineering (BNU-KSEI).

Kingdom of Nokia Aug 01 2020 Kingdom of Nokia tells a fascinating story of corporatism in Finland. How did the mobile phone giant Nokia make the Finnish elite willing to serve the interests of the company? Nokia became a global player in mobile communications in the 1990s, and helped establish Anglo-Saxon capitalism in Finland. Through its success and strong lobbying, the company managed to capture the attention of Finnish politicians, civil servants, and journalists nationwide. With concrete detailed examples, Kingdom of Nokia illustrates how Nokia organised lavish trips to journalists and paid direct campaign funding to politicians to establish its role at the core of Finnish decision-making. As a result, the company influenced important political decisions such as joining the European Union and adopting the euro, and further, Nokia even drafted its own law to serve its special interests. All this in a country considered one of the least corrupt in the world.

Life is an Adventure of Beauty n Grace Nov 16 2021 A friend once asked me to say something. I told him that Light and Absence of Light are construed as desirable or undesirable depending on one's current state. Both are powered by the same Brahman, both are willed by Him alone. Such words are galore in the scriptures and soften the heart. However the scriptures also go on to say that troubled times are the result of one's own making, faulty living, and being a willing slave to the shad vikaras. This is what I couldn't tell him. However know that we all have 400 years of life, then we merge into Brahman and become one with the Divine. At the end of 400 years it doesn't matter how we played our role, if we were good actors or if we were plain dumb. Hope a few can tune the thoughts expounded here and make them theirs, not in thought but in action. These are from a life well-lived, graciously shared, and richly blessed. In fact it is the story of most humans. The story of a sojourn to planet earth. Om Svasti

[What's a Cellphilm?](#) Oct 15 2021 What's a Cellphilm? explores cellphone video production for its contributions to participatory visual research. There is a rich history of integrating participants' videos into community-based research and activism. However, a reliance on camcorders and digital cameras has come under criticism for exacerbating unequal power relations between researchers and their collaborators. Using cellphones in participatory visual research suggests a new way forward by working with accessible, everyday technology and integrating existing media practices. Cellphones are everywhere these days. People use mobile technology to visually document and share their lives. This new era of democratized media practices inspired Jonathan Dockey and Keyan Tomaselli to coin the term cellphilm (cellphone + film). The term signals the coming together of different technologies on one handheld device and the emerging media culture based on people's use of cellphones to create, share, and watch media. Chapters present practical examples of cellphilm research conducted in Canada, Hong Kong, Mexico, the Netherlands and South Africa. Together these contributions consider several important methodological questions, such as: Is cellphilm a new research method or is it re-packaged participatory video? What theories inform the analysis of cellphilms? What might the significance of frequent advancements in cellphone technology be on cellphilms? How does our existing use of cellphones inform the research process and cellphilm aesthetics? What are the ethical dimensions of cellphilm use, dissemination, and archiving? These questions are taken up from interdisciplinary perspectives by established and new academic contributors from education, Indigenous studies, communication, film and media studies.

[La caza del genio del crimen](#) Apr 28 2020 Paul LeRoux nació en Zimbabue y se crio en Sudáfrica. Tras sus primeros trabajos como empresario pionero en la seguridad informática, se lanzó de cabeza al lado oscuro, utilizando su extraordinario talento para desarrollar un nuevo modelo de negocio en el crimen organizado. Por el camino, creó un grupo de mercenarios compuesto por antiguos francotiradores de EE.UU. y de la OTAN para llevar a cabo asesinatos por su propio placer y beneficio. El imperio criminal que construyó fue el Cártel 4.0, utilizando la economía digital y las herramientas de la nueva era. Los negocios de LeRoux, conectados virtualmente a través de su propia web oscura, se extendían desde el Sudeste asiático hacia Oriente Medio y África hasta llegar a Brasil; generaron cientos de millones de dólares en venta de armas, drogas, productos químicos, bombas, tecnología de misiles y asesinatos. Negociaba con países al margen de la ley —Irán y Corea del Norte—, además de la Triada china, los piratas somalíes, la mafia serbia, moteros proscritos, funcionarios africanos y asiáticos corruptos y golpistas. Inicialmente, LeRoux aparecía como una imagen fantasma en los radares de las fuerzas de la seguridad y de los servicios de inteligencia, una presencia inexplicable en mitad de un sinfín de negocios criminales. Pero llamó la atención de un pequeño grupo de agentes: el Grupo 960, de la División de Operaciones Especiales de la DEA, había llevado a cabo algunas de las operaciones más complejas y peligrosas en la historia de la agencia. Utilizaron métodos poco ortodoxos y confidentes infiltrados para acceder al círculo de confianza de LeRoux y capturarlo. Durante cinco años, Elaine Shannon se sumergió en el turbio mundo de LeRoux. Obtuvo acceso exclusivo a los principales protagonistas, incluyendo agentes secretos que miraban a LeRoux a los ojos todos los días., todo eso reunido en una sola persona. Nos sitúa en la misma habitación que esas personas durante sus encuentros cara a cara. " La caza del genio del crimen de Elaine Shannon nos descubre un mundo global de crimen y política que muy poca gente conoce y, mucho menos, entiende. Nos desvela los nuevos métodos criminales pero también los nuevos personajes que solo pueden existir en los tiempos modernos siendo tan eficaces con la armas como con los ordenadores. ". Mark Bowden, autor de Black Hawk derribado. "Una obra maestra de la investigación. Es sin duda la visión más completa que existe sobre una operación muy compleja y de alto nivel de la DEA. Es una mirada fascinante sobre un sindicato del crimen organizado internacional y de su carismático y letal capo de nueva generación que ha usado internet como un arma a la hora de construir un imperio criminal de nuevo cuño. Paul Leroux es asesino a sangre fría calculador y uno de los criminales más aterradores e intrigantes sobre los que he leído. Una prueba de las habilidades de Shannon como escritora es que este libro se lee como un thriller de esos que no puedes soltar. Meticulosamente documentado y con acceso exclusivo a casi todos los personajes clave de ambos lados de la ley, este es el trabajo definitivo sobre el ascenso y caída de un ser maligno como Paul Leroux, además de ser una saga criminal que te deja con la boca abierta. Shannon lleva al lector dentro de la historia de manera que parece que estás en el mismo cuarto, en la misma caza y en el medio de la acción de toda la operación de la DEA a la caza global del rey del crimen del siglo XXI. Es un sobresaliente trabajo de investigación por una maestra del periodismo". Don Winslow, escritor superventas del New York Times, autor de El cártel, El poder del perro y La frontera

Transactions on Data Hiding and Multimedia Security VII May 10 2021 Since the mid 1990s, data hiding has been proposed as an enabling technology for securing multimedia communication, and is now used in various applications including broadcast monitoring, movie fingerprinting, steganography, video indexing and retrieval, and image authentication. Data hiding and cryptographic techniques are often combined to complement each other, thus triggering the development of a new research field of multimedia security. Besides, two related disciplines, steganalysis and data forensics, are increasingly attracting researchers and becoming another new research field of multimedia security. This journal, LNCS Transactions on Data Hiding and Multimedia Security, aims to be a forum for all researchers in these emerging fields, publishing both original and archival research results. The 7 papers included in this issue deal with the following topics: protection of digital videos, secure watermarking, tamper detection, and steganography.
