Financial Sector Debt Bias Apr 26 2022 Most tax systems create a tax bias toward debt finance. Such debt bias increases leverage and may negatively affect financial stability. This paper models and estimates debt bias in the financial sector, and present novel estimates for investment banks and non-bank financial intermediaries such as finance and insurance companies. We find debt bias to be pervasive, explaining as much as 10 percent of total leverage for regular banks and 20 percent for investment banks, with the effects most pronounced before the global financial crisis. Going forward, debt bias is likely to once again gain prominence as a key driver of leverage decisions, underscoring the importance of policy reform at this juncture.

A Guide to the World Bank Jun 24 2019 The World Bank Group works in more than 100 developing economies and is one of the world's largest sources of development assistance. In 2002, the institution provided US \$19.5 billion in loans to its client countries. This guide reviews the organisation's history, objectives and operations, and looks at the five institutions that make up the World Bank Group: the International Bank for Reconstruction and Development (IBRD), the International Development Association (IDA), the International Finance Corporation (IFC), the Multilateral Investment Guarantee Agency (MIGA), and the International Centre for Settlement of Investment Disputes (ICSID).

Fundamentals of Medium/Heavy Duty Commercial Vehicle Systems Mar 26 2022 "Thoroughly updated and expanded, 'Fundamentals of Medium/Heavy Duty Commercial Vehicle Systems, Second Edition' offers comprehensive coverage of basic concepts building up to advanced instruction on the latest technology, including distributed electronic control systems, energy-saving technologies, and automated driver-assistance systems. Now organized by outcome-based objectives to improve instructional clarity and adaptability and presented in a more readable format, all content seamlessly aligns with the latest ASE Medium-Heavy Truck Program requirements for MTST." --Back cover.

OECD Statistics on International Trade in Services 2010, Volume I, Detailed tables by service category Oct 09 2020 Les informations contenues dans cette publication rassemblent les statistiques sur les échanges internationaux par catégories détaillées de services pour les 30 pays de l'OCDE, l'Union européenne et la zone euro.

Finland Sep 19 2021 This Selected Issues and Analytical Note on Finland discusses the potential spillovers to Finland from various shocks associated with cross-country interlinkages. The note provides an overview of the trade and financial linkages, assesses the impact of global fiscal consolidation on Finland via trade links, quantifies dynamic contributions from external sources to growth, and uses these contributions to forecast the potential loss to Finnish GDP from a growth slowdown in other European countries; and analyzes the potential impact from the banking sector or sovereign stress.

A Revision of the Dulcamaroid Clade of Solanum L. (Solanaceae) May 28 2022 This volume is a monograph of the 47 species of the Dulcamaroid clade of the large and diverse genus Solanum. Species in the group occur in North, Central and South America, and in Europe and Asia. The group is most species-rich in Peru and Brazil, and three of the component species, Solanum laxum of Brazil, Solanum seforthianum of the Caribbean and Solanum crispum of Chile are cultivated in many parts of the world. All species are illustrated and a distribution map of each is provided. All names are typified and nomenclatural and bibliographic details for all typifications presented. One new species from Ecuador is described. The monograph is the first complete taxonomic treatment of these species since the worldwide monograph of Solanum done by the French botanist Michel-Felix Dunal in 1852.

Tax Policy, Leverage and Macroeconomic Stability Jun 28 2022 Risks to macroeconomic stability posed by excessive private leverage are significantly amplified by tax distortions. 'Debt bias' (tax provisions favoring finance by debt rather than equity) has increased leverage in both the household and corporate sectors, and is now widely recognized as a significant macroeconomic concern. This paper presents new evidence of the extent of debt bias, including estimates for banks and non-bank financial institutions both before and after the global financial crisis. It presents policy options to alleviate debt bias, and assesses their effectiveness. The paper finds that thin capitalization rules restricting interest deductibility have only partially been able to address debt bias, but that an allowance for corporate equity has generally proved effective. The paper concludes that debt bias should feature prominently in countries' tax reform plans in the coming years.

Economic Development of Myanmar Oct 01 2022 There are a number of excellent studies by eminent Myanmar economists as well as scholars from abroad covering different post-war periods and/or various aspects of development in Myanmar. What this book does is to bring them altogether, as it were, under one roof by recasting bits and pieces of their work according to the author's own understanding. In doing so, a holistic approach was adopted in order to have a well-rounded account of developments over the past fifty years or more. In addition, an attempt has also been made to present the major developments at different periods of time between 1948 and 2000 in a simple, but not over simplified, reader-friendly format so as to reach as wide an audience as possible. It is the author's ardent wish that not only students and policy-makers, but Myanmar people in all walks of life will read the book, discuss it, and work together for a better future.

Second Assessment of Climate Change for the Baltic Sea Basin Apr 02 2020 ?This book is an update of the first BACC assessment, published in 2008. It offers new and updated scientific findings in regional climate research for the Baltic Sea basin. These include climate changes since the last glaciation (approx. 12,000 years ago), changes in the recent past (the last 200 years), climate projections up until 2100 using state-of-the-art regional climate models and an assessment of climate-change impacts on terrestrial, freshwater and marine ecosystems. There are dedicated new chapters on sea-level rise, coastal erosion and impacts on urban areas. A new set of chapters deals with possible causes of regional climate change along with the global effects of increased greenhouse gas concentrations, namely atmospheric aerosols and land-cover change. The evidence collected and presented in this book shows that the regional climate has already started to change and this is expected to continue. Projections of potential future climates show that the region will probably become considerably warmer and wetter in some parts, but dryer in others. Terrestrial and aquatic ecosystems have already shown adjustments to increased temperatures and are expected to undergo further changes in the near future. The BACC II Author Team consists of 141 scientists from 12 countries, covering various disciplines related to climate research and related impacts. BACC II is a project of the Baltic Earth research network and contributes to the World Climate Research Programme.

Trafficking Inside Cells Dec 23 2021 This book covers the past, present and future of the intra-cellular trafficking field, which has made a quantum leap in the last few decades. It details how the field has developed and evolved as well as examines future directions.

Cell Polarity in Development and Disease May 04 2020 Cell Polarity in Development and Disease offers insights into the basic molecular mechanisms of common diseases that arise as a result of a loss of ordered organization and intrinsic polarity. Included are diseases affecting highly polarized epithelial tissues in the lung and kidney, as well as loss and gain of cell polarity in the onset and progression of cancer. This book provides a basic resource for understanding the biology of polarity, offering a starting point for those thinking of targeting cell polarity for translational medical research. Provides basic science understanding of cell polarity disease and development Covers diseases affecting polarized epithelial tissues in the lung and kidney, also covering the progression of cancer Includes historical context of cell polarity research for potential future breakthroughs

The People's Republic of China Apr 14 2021 This 2016 Article IV Consultation highlights China's continued transition to sustainable growth, with progress on many fronts. Growth slowed to 6.9 percent in 2015 and is projected to moderate to 6.6 percent in 2016 owing to slower private investment and weak external demand. The economy is advancing on many dimensions of rebalancing, particularly switching from industry to services and from investment to consumption. But other aspects are lagging, such as strengthening state-owned enterprises and financial governance and containing rapid credit growth. The current account surplus is projected to decline to 2.5 percent of GDP in 2016 as imports increase and the services deficit widens with continued outbound tourism.

Data Analysis Using Stata Jul 18 2021 "This book provides a comprehensive introduction to Stata with an emphasis on data management, linear regression, logistic modeling, and using programs to automate repetitive tasks. Using data from a longitudinal study of private households in Germany, the book presents many examples from the social sciences to bring beginners up to speed on the use of Stata." -- BACK COVER.

Basic Protein and Peptide Protocols Aug 07 2020 Basic Protein and Peptide Protocols offers an excellent collection of reproducible, step-by-step laboratory methods covering three major areas: (1) the quantitation and characterization of proteins, (2) the electrophoretic and blotting procedures used in protein isolation and characterization, and (3) the analysis of protein and peptide structure. THOUSANDS of labs are already using Basic Protein and Peptide Protocols-you should be too!

Statistical Year Book May 16 2021

The Biology of Ascidiaceans Feb 22 2022 Ascidiaceans are the invertebrate group that gave rise to vertebrates, thus the biology of ascidiaceans provides an essential key to understanding both invertebrates and vertebrates. This book is the first to cover all areas of ascidiacean biology, including development, evolution, biologically active substances, heavy metal accumulation, asexual reproduction, host-defense mechanisms, allorecognition mechanisms, comparative immunology, neuroscience, taxonomy, ecology, genome science, and food science. The 69 articles that make up the collection were contributed by leading ascidiologists from all over the world who participated in the First International Symposium on the Biology of Ascidiaceans, held in June 2000 in Sapporo, Japan. For scientists and students alike, the book is an invaluable source of information from the latest, most comprehensive studies of ascidiacean biology.

IBSS: Political Science: 2009 Vol. 58 Jul 06 2020 First published in 1952, the International Bibliography of the Social Sciences (anthropology, economics, political science, and sociology) is well established as a major bibliographic reference for students, researchers and librarians in the social sciences worldwide. Key features: * Authority: Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced. Articles and books are selected on merit by some of the world's most expert librarians and academics. * Breadth: Today the IBSS covers over 2000 journals - more than any other comparable resource. The latest monograph publications are also included. * International Coverage: The IBSS reviews scholarship published in over thirty languages, including publications from Eastern Europe and the developing world. * User friendly organization: all non-English titles are word sections. Extensive author, subject and place name indexes are provided in both English and French.

Preparative Chromatography Techniques Jan 24 2022 Over the past few years, increasing attention has been paid to the search for bioactive compounds from natural sources. The success of plant-derived products such as paclitaxel (Taxol) in tumor therapy or artemisinin in the treatment of malaria has provided the impetus for the introduction of numerous research programmes, especially in industry. A great deal of effort is being expended in the generation of novel lead molecules of vegetable, marine and microbial origin by the use of high throughput screening protocols. When interesting hits are found, it is essential to have methods available for the rapid isolation of target compounds. For this reason, both industry and academia need efficient preparative chromatographic separation techniques and experience in their application. Purified natural products are required for complete spectroscopic identification and full characterization of new compounds, for biological testing and for the supply of pharmaceuticals, standards, and starting materials for synthetic work. Obtaining pure products from an extract can be a very long, tedious and expensive undertaking, involving many steps. Sometimes only minute amounts of the desired compounds are at hand and these entities may be labile. Thus it is an advantage to have access to as many different methods as possible in order to aid the isolation process. Although a certain amount of trial and error may be involved, nowadays there is the possibility of devising suitable rapid separation schemes by a judicious choice of the different techniques available.

The Indigenous World 2016 Jul 26 2019 In over sixty articles and country reports, The Indigenous World 2016 provides a comprehensive update on the current situation of indigenous peoples' causes, their human rights, and reports on the most important developments in international processes of relevance to indigenous peoples during 2015. It is an indispensable guide to issues and developments that have impacted indigenous peoples worldwide. Indigenous and non-indigenous scholars and activists write the articles contained in The Indigenous World. It is edited and produced by the International Work Group for Indigenous Affairs.
