**Images of Postmodern Society** Sep 27 2019 By using a series of studies of contemporary mainstream Hollywood movies - Blue Velvet, Wall Street, Crimes and Misdemeanors, When Harry Met Sally, sex lies

and videotape, *Do the Right Thing* - Norman K Denzin explores the tension between ideas of the postmodern, and traditional ways of analyzing society. The discussion moves between two forms of text: social theory and cinematic representations of contemporary life. Denzin analyzes the ideas of society embedded in poststructuralism, postmodernism, feminism, cultural studies and Marxism through the ideas of key theorists (Mills, Baudrillard, Barthes, Habermas, Jameson, Bourdieu, Derrida and others). He relates these ideas to the problematic of the postmodern self as e

**The Mobile Photographer** Sep 19 2021 It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that statement—that camera phones aren't "real" cameras and that the people who use them aren't "real" photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more "serious" equipment. In this book, Fisher guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box

controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the "base" camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.

*Killers of the King* Sep 07 2020 January, 1649. After seven years of fighting in the bloodiest war in Britain's history, Parliament had overpowered King Charles I and now faced a problem: what to do with a defeated king, a king who refused to surrender? Parliamentarians resolved to do the unthinkable, to disregard the Divine Right of Kings and hold Charles I to account for the appalling suffering and slaughter endured by his people. A tribunal of 135 men was hastily gathered in London, and although Charles refused to acknowledge the power of his subjects to try him, the death sentence was unanimously passed. On an icy winter's day on a scaffold outside Whitehall, in an event unique in

English history, the King of England was executed. When the dead king's son, Charles II, was restored to the throne, he set about enacting a deadly wave of retribution against all those – the lawyers, the judges, the officers on the scaffold – responsible for his father's death. Some of the 'regicides' – the killers of the king – pleaded for mercy, while others stoically awaited their sentence. Many went into hiding in England, or fled to Europe or America. Those who were caught and condemned suffered agonising and degrading ends, while others saw out their days in hellish captivity. Bestselling historian Charles Spencer explores this violent clash of ideals through the individuals whose fates were determined by that one, momentous decision. A powerful tale of revenge from the dark heart of royal history and a fascinating insight into the dangers of political and religious allegiance in Stuart England, these are the shocking stories of the men who dared to kill a king.

Isaac Albéniz Apr 02 2020 Walter Aaron Clark here presents, for the first time in English, a detailed and accurate account of one of the most intriguing musicians of the late-Romantic period. Isaac Albeniz (1860-1909), a renowned concert pianist, created a national style of composition in such celebrated piano collections as the Suite espanola, Cantos de Espana, and Iberia. He also fostered the development of Spanish nationalism in the concerto, orchestral music, and opera. He was thus the first composer to put into successful practice the nationalist precepts of his mentor Felip Pedrell. Moreover, he incorporated contemporary French and German trends into his Spanish style in order, as he put it, 'to create Spanish music with a universal accent'. In so doing he pointed the way for Falla, Turina, and Rodrigo, the dominant figures of twentieth-century Spanish composition.

*The Causes of Molecular Evolution* Nov 21 2021 This work provides a unified theory that addresses the important problem of the origin and maintenance of genetic variation in natural populations. With modern molecular techniques, variation is found in all species, sometimes at astonishingly high levels. Yet, despite these observations, the forces that maintain variation within and between species have been difficult subjects of study. Because they act very weakly and operate over vast time scales, scientists must rely on indirect inferences and speculative mathematical models. However, despite these obstacles, many advances have been made. The author's research in molecular genetics, evolution, and bio-mathematics has enabled him to draw on this work, and present a coherent and valuable view of the field. The book is divided into three parts. The first consists of three chapters on protein evolution, DNA evolution, and molecular mechanisms. This section reviews the experimental observations on genetic variation. The second part gives a

unified treatment of the mathematical theory of selection in a fluctuating environment. The final two chapters combine the earlier assessments in a treatment of the scientific status of two competing theories for the maintenance of genetic variation. Steeped in the enormous advances population genetics has made over the past 25 years, this book has proven highly popular among human geneticists, biologists, evolutionary theorists, and bio-mathematicians.
