SHORTLISTED FOR THE
ANDRE SIMON AWARD
The long awaited new book from Harold McGee, winner of the André Simon Food Book of the Year & the James Beard Award. What is smell? How does it work? And why is it so important? HAROLD McGEE, leading expert on the science of food and cooking, has spent

a decade exploring our most overlooked sense. Nose Dive is the amazing result: it takes us on an adventure across four billion years and the whole globe, from the sulphurous early Earth to the fruit-filled Tian Shan mountain range north of the Himalayas, and back to the keyboard of your laptop, where trace notes of phenol and formaldehyde are escaping between the keys. A work of astounding scholarship and originality, Nose Dive distils the science behind smells and translates it into an accessible and entertaining sensory and olfactory guide. We'll sniff the ordinary (wet pavement and cut grass) and extraordinary (ambergris and truffles), the delightful (roses and vanilla) and the challenging (swamplands and durians). We'll smell each other. We'll smell ourselves. Here is a story of the world, of all of the smells under our noses. DIVE IN!

Commercial Chicken Meat and Egg Production Jun 29 2022

Commercial Chicken Meat and Egg Production is the 5th edition of a highly successful book first authored by Dr. Mack O. North in 1972, updated in 1978 and 1984. The 4th edition was co-authored with Donald D. Bell in 1990. The book has achieved international success as a reference for students and commercial poultry and egg producers in every major poultry producing country in the world. The 5th edition is essential reading for students preparing to enter the poultry industry, for owners and managers of existing poultry companies and for scientists who need a major source of scientifically based material on poultry management. In earlier editions, the authors emphasized the chicken and its management. The 5th edition, with the emphasis shifted to the commercial business of managing poultry, contains over 75% new material. The

contributions of 14 new authors make this new edition the most comprehensive such book available. Since extensive references are made to the international aspects of poultry management, all data are presented in both the Imperial and Metric form. Over 300 tables and 250 photos and figures support 62 chapters of text. New areas include processing of poultry and eggs with thorough discussions of food safety and further processing. The business of maintaining poultry is discussed in chapters on economics, model production firms, the use of computers, and record keeping. Updated topics include: breeders and hatchery operations; broiler and layer flock management; replacement programs and management of replacements; nutrition; and flock health. New chapters address flock behavior, ventilation, waste management, egg quality and egg breakage. Other new features include a list of more than 400 references and a Master List of the tables,

figures, manufacturers of equipment and supplies, research institutions, books and periodicals, breeders, and trade associations. Commercial growers will find the tables of data of particular interest; scientists will be able to utilize the extensive references and to relate their areas of interest to the commercial industry's applications; and students will find that the division of the book into 11 distinct sections, with multiple chapters in each, will make the text especially useful.

Reasons and Persons Jun 05 2020 This book challenges, with several powerful arguments, some of our deepest beliefs about rationality, morality, and personal identity. The author claims that we have a false view of our own nature; that it is often rational to act against

our own best interests; that most of us have moral views that are directly self-defeating; and that, when we consider future generations the conclusions will often be disturbing. He concludes that moral non-religious moral philosophy is a young subject, with a promising but unpredictable future.

The Twisted Thread Oct 02 2022 When beautiful but aloof Claire Harkness is found dead in her dorm room one spring morning, prestigious Armitage Academy is shaken to its core. Everyone connected to school, and to Claire, finds their lives upended, from the local police detective who has a personal history with the academy, to the various faculty and staff whose lives are immersed in the daily rituals associated with it. Everyone wants to know how Claire died, at whose hands, and more importantly, where the baby that she recently gave birth to is--a baby that almost no one, except her small innermost circle, knew she was carrying. At the center

of the investigation is Madeline Christopher, an intern in the English department who is forced to examine the nature of the relationship between the school's students and the adults meant to guide them. As the case unravels, the dark intricacies of adolescent privilege at a powerful institution are exposed, and both teachers and students emerge as suspects as the novel rushes to its thrilling conclusion. With *The Twisted Thread*, Charlotte Bacon has crafted a gripping and suspenseful story in the tradition of Donna Tartt's *The Secret History*, one that pulls back the curtain on the lives of the young and privileged.
