Tigers of the World May 31 2020 The second edition of *Tigers of the World* explores tiger biology, ecology, conservation, management, and the science and technology that make this possible. In 1988, when the first edition was published, tiger conservation was still in its infancy, and two decades later there has been a revolution not only in what is known, but how information about tigers is obtained and disseminated. In the fast changing world of conservation, there is a great need to summarize the vast and current state-of-the-art, to put this into historical perspective, and to speculate in what yet remains to be done. *Tigers of the World, 2e* fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume. Despite the challenges ahead, there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists, conservation biologists, wildlife managers, natural resource policymakers, and most importantly the caring public. *Examines the past twenty years of research from the world's leading tiger experts on biology, politics, and conservation. *Describes latest methods used to disseminate and obtain information needed for conservation and care of this species. *Includes coverage on genetics and ecology, policy, poaching and trade, captive breeding and farming, and the status of Asia's last wild tigers. *Excellent resource for grad courses in conservation biology, wildlife management, and veterinary programs. *New volume continues the classic Noyes Series in Animal Behavior, Ecology, Conservation and Management.

Environmental Aspects of Textile Dyeing Sep 27 2022 Textile dyes enhance our environment, bringing colour into our lives. The current range of dyes have been developed to withstand environmental effects, such as degradation by exposure to light and water. However, the industry involved with the application of dyes to textiles has a

responsibility to ensure that potential for harm to the environment, for example through residues in waste-streams, and to the consumer is minimised. Written by an international team of contributors, this collection reviews current legislation and key technologies which make textile dyeing more efficient and environmentally friendly. The book begins by detailing European and US legislation relating to textile dyeing. Further chapters cover toxicology, environmentally responsible application of dyes and supercritical fluid textile dyeing. The book concludes with chapters on the reduction of pollution and minimisation of waste, the re-use of spent dyebath, chemical treatment of dye effluent and biotechnological treatment of dye effluent. Environmental aspects of textile dyeing is a standard reference source for manufacturers concerned with developing a sustainable industry. Crucial guide to minimising harmful effects on environment and the consumer Reviews current technologies and European and US legislation Essential for all textile manufacturers

Closed Casket Aug 22 2019 Hercule Poirot, the world's most famous detective, returns in this ingenious, stylish, and altogether delicious mystery from the author of the instant bestseller *The Monogram Murders*. "What I intend to say to you will come as a shock..." With these words, Lady Athelinda Playford -- one of the world's most beloved children's authors -- springs a surprise on the lawyer entrusted with her will. As guests arrive for a party at her Irish mansion, Lady Playford has decided to cut off her two children without a penny . . . and leave her vast fortune to someone else: an invalid who has only weeks to live. Among Lady Playford's visitors are two strangers: the famous Belgian detective Hercule Poirot, and Inspector Edward Catchpool of Scotland Yard. Neither knows why he has been invited -- until Poirot begins to wonder if Lady Playford expects a murder. But why does she seem so determined to provoke a killer? And why -- when the crime is committed despite Poirot's best efforts to stop it -- does the identity of the victim make no sense at all? Addictive, ferociously clever, and packed with clues, wit, and murder, *Closed Casket* is a triumph from the author whose work is "as tricky as anything written by Agatha Christie" (Alexander McCall Smith, *The New York Times Book Review*).

Venomous Jan 20 2022 A thrilling tale of encounters with nature's masters of biochemistry From the coasts of Indonesia to the rainforests of Peru, venomous animals are everywhere—and often lurking out of sight. Humans have feared them for centuries, long considering them the assassins and pariahs of the natural world. Now, in *Venomous*, the biologist Christie Wilcox investigates and illuminates the animals of our nightmares, arguing that they hold the keys to a deeper understanding of evolution, adaptation, and immunity. She reveals just how venoms function and what they do to the human body. With Wilcox as our guide, we encounter a jellyfish with tentacles covered in stinging cells that can kill humans in minutes; a two-inch caterpillar with toxic bristles that trigger hemorrhaging; and a stunning blue-ringed octopus capable of inducing total paralysis. How do these animals go about their deadly work? How did they develop such intricate, potent toxins? Wilcox takes us around the world and down to the cellular level to find out. Throughout her journey, Wilcox meets the intrepid scientists who risk their lives studying these lethal beasts, as well as "self-immunizers" who deliberately expose themselves to snakebites. Along the way, she puts her own life on the line, narrowly avoiding being envenomated herself. Drawing on her own research, Wilcox explains how venom scientists are untangling the mechanisms of some of our most devastating diseases, and reports on pharmacologists who are already exploiting venoms to produce lifesaving drugs. We discover that venomous creatures are in fact keystone species that play crucial roles in their ecosystems and ours—and for this alone, they ought to be protected and appreciated. Thrilling and surprising at every turn, *Venomous* will change everything you thought you knew about the planet's most dangerous animals.

Psychology and Climate Change Mar 22 2022 *Psychology and Climate Change: Human Perceptions, Impacts, and Responses* organizes and summarizes recent psychological research that relates to the issue of climate change. The book covers topics such as how people perceive and respond to climate change, how people understand and communicate about the issue, how it impacts individuals and communities, particularly vulnerable communities, and how individuals and communities can best prepare for and mitigate negative climate change impacts. It addresses the topic at multiple scales, from individuals to close social networks and communities. Further, it considers the role of social diversity in shaping vulnerability and reactions to climate change. *Psychology and Climate Change* describes the implications of psychological processes such as perceptions and motivations (e.g., risk perception, motivated cognition, denial), emotional responses, group identities, mental health and well-being, sense of place, and behavior (mitigation and adaptation). The book strives to engage diverse stakeholders, from multiple disciplines in addition to psychology, and at every level of decision making - individual, community, national, and international, to understand the ways in which human capabilities and tendencies can and should shape policy and action to address the urgent and very real issue of climate change. Examines the role of knowledge, norms, experience, and social context in climate change awareness and action Considers the role of identity threat, identity-based motivation, and belonging Presents a conceptual framework for classifying individual and household behavior Develops a model to explain environmentally sustainable behavior Draws on what we know about participation in collective action Describes ways to improve the effectiveness of climate change communication efforts Discusses the difference between acute climate change events and slowly-emerging changes on our mental health Addresses psychological

stress and injury related to global climate change from an intersectional justice perspective Promotes individual and community resilience

Ideology and Revolution in Southeast Asia 1900-75 Nov 25 2019 The concept of 'Asian Values' has recently been emphasized by East and South East Asian political leaders. These leaders have argued that European political values have exercised an unhealthy hegemony over the international system, not only because of global influence exercised by European ideas during the colonial period, but because of 'Anglo-Saxon' dominance over the world orders that were set up in the aftermath of both the First and Second World Wars. This book considers the interaction between indigenous ('Asian') values and European ideology and the influence this relationship had on the nationalist and revolutionary movements of Southeast Asia that dominated the political systems of Southeast Asia in the period 1945-1975.

Christie Tate had just been named the top student in her law school class and finally had her eating disorder under control. Why then was she driving through Chicago fantasizing about her own death? Why was she envisioning putting an end to the isolation and sadness that still plagued her despite her achievements? Enter Dr. Rosen, a therapist who calmly assures her that if she joins one of his psychotherapy groups, he can transform her life. All she has to do is show up and be honest. About everything—her eating habits,

childhood, sexual history, etc. Christie is skeptical, insisting that that she is defective, beyond cure. But Dr. Rosen issues a nine-word prescription that will change everything: "You don't need a cure. You need a witness." So begins her entry into the strange, terrifying, and ultimately life-changing world of group therapy. Christie is initially put off by Dr. Rosen's outlandish directives, but as her defenses break down and she comes to trust Dr. Rosen and to depend on the sessions and the prescribed nightly phone calls with various group members, she begins to understand what it means to connect. "Often hilarious, and ultimately very touching" (People), Group is "a wild ride" (The Boston Globe), and with Christie as our guide, we are given a front row seat to the daring, exhilarating, painful, and hilarious journey that is group therapy—an under-explored process that breaks you down, and then reassembles you so that all the pieces finally fit.

Stories Apr 10 2021 Stories are perceived as central to modern life. Not only in narrative entertainment media, such as television, cinema, theater, but also in social media. Telling/having "a story" is widely deemed essential, in business as well as in social life. Does this mark an intensification of what has always been part of human cultures; or has the realm of "story" expanded to dominate twenty-first century discourse? Addressing stories is an obvious priority for the Key Debates series, and Volume 7, edited by Ian Christie and Annie van den Oever, identifies new phenomena in this field -- complex narration, puzzle films, transmedia storytelling -- as well as new approaches to understanding these, within narratology and bio-cultural studies. Chapters on such extended television series as *Twin Peaks*, *Game of Thrones* and *Dickensian* explore distinctively new forms of screen storytelling in the digital age. With contributions by Vincent Amiel, Jan Baetens, Dominique Chateau, Ian Christie, John Ellis, Miklós Kiss, Eric de Kuyper, Sandra Laugier, Luke McKernan, José Moure, Roger Odin, Annie van den Oever, Melanie Schiller, Steven Willemsen, Robert Ziegler.

Developmental Juvenile Osteology Dec 07 2020 *Developmental Juvenile Osteology* was created as a core reference text to document the development of the entire human skeleton from early embryonic life to adulthood. In the period since its first publication there has been a resurgence of interest in the developing skeleton, and the second edition of *Developmental Juvenile Osteology* incorporates much of the key literature that has been published in the intervening time. The main core of the text persists by describing each individual component of the human skeleton from its embryological origin through to its final adult form. This systematic approach has been shown to assist the processes of both identification and age estimation and acts as a core source for the basic understanding of normal human skeletal development. In addition to this core, new sections have been added where there have been significant advances in the field. Identifies every component of the juvenile skeleton, by providing a detailed analysis of development and ageing and a detailed description of each bone in four ways: adult bone, early development, ossification and practical notes New chapters and updated sections covering the dentition, age estimation in the living and bone histology An updated bibliography documenting the research literature that has contributed to the field over the past 15 years since the publication of the first edition Heavily illustrated, including new additions

Lipid Analysis Jun 24 2022 This well-known and highly successful book was first published in 1973 and has been completely re-written in subsequent editions (published in 1982 and 2003). This new Fourth Edition has become necessary because of the pace of developments in mass spectrometry of intact lipids, which has given recognition of lipid analysis and 'lipidomics' as a distinct science. To bring the book up to date with these developments, author William W. Christie is joined by co-author Xianlin Han. Although devoting considerable space to mass spectrometry and lipidomics, Lipid analysis remains a practical guide, in one volume, to the complexities of the analysis of lipids. As in past editions, it is designed to act as a primary source, of value at the laboratory bench rather than residing on a library shelf. Lipid analysis deals with the isolation, separation, identification and structural analysis of glycerolipids, including triacylglycerols, phospholipids, sphingolipids, and the various hydrolysis products of these. The chapters follow a logical sequence from the extraction of lipids to the isolation and characterization of particular lipid classes and of molecular species of each, and to the mass spectrometric analysis of lipids and lipidomics. The new influence of mass spectrometry is due mainly to the development of electrospray ionization (ESI) and matrix-assisted laser desorption/ionization (MALDI). Most emphasis in this book is placed on ESI, which is enabling structural characterization of different lipid classes and the identification of novel lipids and their molecular species.

The Riot at Christie Pits Sep 15 2021 Ethnic tensions had been rising in Toronto throughout the hot summer of 1933. Hitler had recently come to power in Germany and some residents of the eastern beaches neighbourhood had formed "Swastika Clubs" to protect their community from "undesirable elements." On August 16, at Toronto's Christie Pits, a baseball game between two local teams - one made up of Jewish players - ignited the simmering resentments. Some troublemakers unfurled a huge swastika flag, shouting, "Heil Hitler!" Retaliation from Jewish spectators and players was swift and reinforcements for both sides poured into the park. The result - never experienced in Toronto before or since - was a four-hour race riot. The riot at Christie Pits remains a disturbing, even legendary part of the city's history. Authors Cyril Levitt and William Shaffir, carefully sifting fact from fiction, provide a compelling perspective on how ordinary Canadians reacted to the intensifying antisemitism in Europe.
