Why Things Matter to People Apr 27 2022 Andrew Sayer undertakes a fundamental critique of social science's difficulties in acknowledging that people's relation to the world is one of concern. As sentient beings, capable of flourishing and suffering, and particularly vulnerable to how others treat us, our view of the world is substantially evaluative. Yet modernist ways of thinking encourage the common but extraordinary belief that values are beyond reason, and merely subjective or matters of convention, with little or nothing to do with the kind of beings people are, the quality of their social relations, their material circumstances or well-being. The author shows how social theory and philosophy need to change to reflect the complexity of everyday ethical concerns and the importance people attach to dignity. He argues for a robustly critical social science that explains and evaluates social life from the standpoint of human flourishing.

Social Matter, Social Design Dec 04 2022 When you start to deconstruct or question design, all sorts of questions emerge: How does design affect our behaviour, our use of resources, our choices and freedoms to participate in social, political or economic decision-making, and the extent to which we feel we have agency over our lives? Jan Boelen in conversation with Michael Kaethlers Social matter, social design' challenges the way we look at, think of, and interact with the social world by emphasising the role of materiality. This enlarged field for engagement demands that design incorporates a more nuanced and complex reading of how the social is intertwined with the material, which confronts the often reductive or simplistic notion of 'social design?', and offers novel forms of critical and meaningful engagement at a time of mounting social contradictions.0The essays in this book explore and unveil uncanny, disconcerting or discordant connections, bricolages, assumptions or breaches at critical junctures for transformation. They are centred around four major themes: the body; earth; the political; and technology.

Methods That Matter Nov 30 2019 To do research that really makes a difference -- the authors of this book argue -- social scientists need a diverse set of questions and methods, both qualitative and quantitative, in order to reflect the complexity of the world. Bringing together a consortium of voices across a variety of fields, Methods That Matter offers compelling and successful examples of mixed methods research that does just that. Discussing their own endeavors to combine quantitative and qualitative methodologies, the authors invite readers into a conversation about the best designs and practices of mixed methods to stimulate creative ideas and find new pathways of insight. The result is an engaging exploration of a promising approach to the social sciences. --

You Matter More Than You Think: Quantum Social Change for a Thriving World May 05 2020 You Matter More Than You Think introduces a new way of thinking about climate change and social change. It focuses on how the small changes we make can have a big impact, and why each of us matters when it comes to sustainability.

Differences That Matter Nov 10 2020 This book shines a spotlight on the causes and consequences of working poverty, revealing how the lives of low-wage workers are affected by differences in health care, labor, and social welfare policy in the United States and Canada. Dan Zuberi's conclusions are based on survey data, eighteen months of participant observation fieldwork, and in-depth interviews with seventy-seven hotel employees working in parallel jobs on both sides of the border. Two hotel chains, each with one union and one non-union hotel in Seattle and Vancouver, provide a vivid crossnational comparison because they are similar in so many regards, the one major exception being government policy. Zuberi demonstrates how labor, health, social welfare, and public investment policy affect these hotel workers and their families. His book challenges the myth that globalization necessarily means hospitality jobs must be insecure and pay poverty wages and makes clear the critical role played by government policy in the reduction of poverty and creation of economic equality. Zuberi shows exactly where and how the social policies that distinguish the Canadian welfare state from the U.S. version make a difference in protecting Canadian workers from the hardships that burden low-wage workers in the United States. **Differences That Matter**, which is filled with first-person accounts, ends with policy recommendations and a call for grassroots community organizing.

Spirituality Matters in Social Work Sep 08 2020 Offering a focus that is lacking (or not clearly evident) in most spirituality books, Dudley addresses specific ways of incorporating spirituality into practice and integrates many of the contributions of other writers into an overall eclectic practice approach. His approach revolves around many of the core competencies of the EPAS accreditation (CSWE, 2008). Most of the core competencies are addressed with an emphasis on professional identity, ethical practice, critical thinking, diversity, practice contexts, and, a major practice framework of the book, the practice stages of engagement, assessment, intervention, and evaluation.

The Explanation of Crime Oct 10 2020 Integration of disciplines, theories and research orientations has assumed a central role in criminological discourse yet it remains difficult to identify any concrete discoveries or significant breakthroughs for which integration has been responsible. Concentrating on three key concepts: context, mechanisms, and development, this volume aims to advance integrated scientific knowledge on crime causation by bringing together different scholarly approaches. Through an analysis of the roles of behavioural contexts and individual differences in crime causation, **The Explanation of Crime** seeks to provide a unified and focused approach to the integration of knowledge. Chapter topics range from individual genetics to family environments and from ecological behaviour settings to the macro-level context of communities and social systems. This is a comprehensive treatment of the problem of crime causation that will appeal to graduate students and researchers in criminology and be of great interest to policy-makers and practitioners in crime policy and prevention.

Animals in Social Work Jul 07 2020 This collection of essays articulates theoretical and philosophical arguments, and advances practical applications, as to why animals ought to matter to social work, in and of themselves. It serves as a persuasive corrective to the current invisibility of animals in contemporary social work practice and thought.

Why Social Justice Matters Jul 19 2021 He proposes a number of policies to achieve a more equal society and argues that they are economically feasible.

The Genetic Lottery Jan 13 2021 A provocative and timely case for how the science of genetics can help create a more just and equal society In recent years, scientists like Kathryn Paige Harden have shown that DNA makes us different, in our personalities and in our health—and in ways that matter for educational and economic success in our current society. In **The Genetic Lottery**, Harden introduces readers to the latest genetic science, dismantling dangerous ideas about racial superiority and challenging us to grapple with what equality really means in a world where people are born different. Weaving together personal stories with scientific evidence, Harden shows why our refusal to recognize the power of DNA perpetuates the myth of meritocracy, and argues that we must acknowledge the role of genetic luck if we are ever to create a fair society. Reclaiming genetic science from the legacy of eugenics, this groundbreaking book offers a bold new vision of society where everyone thrives, regardless of how one fares in the genetic lottery.

The Arden Research Handbook of Shakespeare and Social Justice Feb 23 2022 **The Arden Research Handbook of Shakespeare and Social Justice** is a wide-ranging, authoritative guide to research on Shakespeare and issues of social justice and arts activism by an international team of leading scholars, directors, arts activists, and educators. Across four sections it explores the relevance and responsibility of art to the real world ? to the significant teaching and learning, performance and practice, theory and economies that not only expand the discussion of literature and theatre, but also open the gates of engagement between the life of the mind and lived experience. The collection draws from noted scholars, writers and practitioners from around the globe to assert the power of art to question, disrupt and re-invigorate both the ties that bind and the barriers that divide us. A series of interviews with theatre practitioners and scholars opens the volume, establishing an initial portfolio of areas for research, exploration, and change. In Section 2 'The Practice of Shakespeare and Social Justice' contributors examine Shakespeare's place and possibilities in intervening on issues of race, class, gender and sexuality. Section 3 'The Performance of Shakespeare and Social Justice' traces Shakespeare and social justice in multiple global contexts; engaging productions grounded in the politics of Mexico, India, South Africa, China and aspects of Asian politics broadly, this section illuminates the burgeoning field of global production while keeping as a priority the political structures that make advocacy and resistance possible. The last section on 'Economies of Shakespeare' describes socio-economic and community issues that come to light in Shakespeare, and their potential to catalyse ongoing discussion and change in respect to wealth, distribution, equity, and humanity. An annotated bibliography provides further guidance to those researching the subject.

Planning as if People Matter Nov 03 2022 American communities are changing fast: ethnic minority populations are growing,

home ownership is falling, the number of people per household is going up, and salaries are going down. According to Marc Brenman and Thomas W. Sanchez, the planning field is largely unprepared for these fundamental shifts. If planners are going to adequately serve residents of diverse ages, races, and income levels, they need to address basic issues of equity. *Planning as if People Matter* offers practical solutions to make our communities more livable and more equitable for all residents. While there are many books on environmental justice, relatively few go beyond theory to give real-world examples of how better planning can level inequities. In contrast, *Planning as if People Matter* is written expressly for planning practitioners, public administrators, policy-makers, activists, and students who must directly confront these challenges. It provides new insights about familiar topics such as stakeholder participation and civil rights. And it addresses emerging issues, including disaster response, new technologies, and equity metrics. Far from an academic treatment, *Planning as if People Matter* is rooted in hard data, on-the-ground experience, and current policy analysis. In this tumultuous period of economic change, there has never been a better time to reform the planning process. Brenman and Sanchez point the way toward a more just social landscape.

The Social Studies Curriculum Jan 31 2020 This updated third edition contains new chapters on important issues—including race, gender, sexuality, and multiculturalism—affecting social studies education.

Social Research Matters Jun 05 2020 Drawing from forty years of experience, Julia Brannen offers an invaluable account of how research in family studies is conducted and 'matters' at particular times. An exceptional resource for family scholars and those interested in the methodology of social research.

How Social Movements (Sometimes) Matter Aug 20 2021 People protest to try to change the world, because they think they can help change the world, and sometimes they do. But not by themselves, and generally not just how and when they want. This incisive book explains how groups of ordinary individuals can affect the world, what makes it possible when it works, and why it sometimes doesn't go to plan. Digging into previous scholarship on social movements, David S. Meyer looks at the origins of social movements, how they contrast with revolutionary campaigns, and assesses the periodic influence of activists on politics, policy, culture, and the way people live their lives. He concludes by stressing the narratives about political change that activists construct and the power that lies in these stories. With sharp insight and a wealth of intriguing cases, this book offers a fuller understanding of the politics and potential payoffs of protest politics.

Does Inequality Matter? How People Perceive Economic Disparities and Social Mobility Feb 11 2021 The recovery after the COVID-19 crisis requires policies and reforms that tackle inequalities and promote equal opportunities. However, the implementation of such reforms requires widespread support from the public. To better understand what factors drive public support, this report provides a detailed cross-country analysis of people's perceptions of and concern over inequality.

Methods Matter Mar 27 2022 Educational policy-makers around the world constantly make decisions about how to use scarce resources to improve the education of children. Unfortunately, their decisions are rarely informed by evidence on the consequences of these initiatives in other settings. Nor are decisions typically accompanied by well-formulated plans to evaluate their causal impacts. As a result, knowledge about what works in different situations has been very slow to accumulate. Over the last several decades, advances in research methodology, administrative record keeping, and statistical software have dramatically increased the potential for researchers to conduct compelling evaluations of the causal impacts of educational interventions, and the number of well-designed studies is growing. Written in clear, concise prose, *Methods Matter: Improving Causal Inference in Educational and Social Science Research* offers essential guidance for those who evaluate educational policies. Using numerous examples of high-quality studies that have evaluated the causal impacts of important educational interventions, the authors go beyond the simple presentation of new analytical methods to discuss the controversies surrounding each study, and provide heuristic explanations that are also broadly accessible. Murnane and Willett offer strong methodological insights on causal inference, while also examining the consequences of a wide variety of educational policies implemented in the U.S. and abroad. Representing a unique contribution to the literature surrounding educational research, this landmark text will be invaluable for students and researchers in education and public policy, as well as those interested in social science.

Why Social Justice Matters Oct 02 2022 He proposes a number of policies to achieve a more equal society and argues that they are economically feasible.

Social Brain Matters Apr 03 2020 This book examines philosophical and scientific implications of Neodarwinism relative to recent empirical data. It develops explanations of social behavior and cognition through analysis of mental capabilities and consideration of ethical issues. It includes debate within cognitive science among explanations of social and moral phenomena from philosophy, evolutionary and cognitive psychology, neurobiology, linguistics, and computer science. Cognitive Science (CS) provides an original corpus of scholarly work that makes explicit the import of cognitive-science research for philosophical analysis. Topics include the nature, structure, and justification of knowledge, cognitive architectures and development, brain-mind theories, and consciousness.

Does Class Matter? May 17 2021 This book provides a comprehensive portrait of class structure, dynamics, and orientations in Singapore — understood as a new nation, a capitalist and emerging knowledge economy, a largely middle-class society, and a polity with a strong state — at the turn of the new millennium. It introduces a wide array of recent data on a broad range of topics relating to social stratification in Singapore: class structure, political participation, political alienation, national pride, welfarism, success values, unionism, social mobility, the digital divide, and the sandwich generation. To capture the lived experiences of people from different social classes, thereby complementing the numerous tables presented, the book also

profiles six case studies of individuals or families, highlighting the challenges they face and the options they possess. Contents: Singapore: Market Economy and Meritocratic, Middle-Class Society? Methodology: Questionnaire, Sampling, and Fieldwork Singapore Class Structure Social Orientations by Class, Age, and Ethnicity Work Career and Social Mobility Problem Areas: Digital Divide and Sandwich Generation 1-to-2 Roomers, 3-Roomers, and Citizen Population Compared Conclusion: Does Class Matter in Singapore? Readership: Undergraduates, graduate students, researchers and professionals in sociology, social issues and political science. Keywords: Singapore; Social Class; Social Stratification; Social Mobility; Class Structure; Class Orientations; Digital Divide; Sandwich Generation; Political Orientations; Success Values; Welfarism Reviews: "... Tan's report should ... interest those fishing for an inside and contemporary sociological scoop on the country. (His) findings also constitute important society-level input to globalization watchers ... The most interesting aspect of the book ... is the six case studies provided in Appendix I." Asia Times Online "This volume is highly readable and is certainly filled with interesting viewpoints about the 'class society' that Singaporeans may be surprised to learn that they should consider seriously. In the book, a quick introduction is provided on the conceptualization of class and its relevance to societies like Singapore's ... the author poses the intriguing question of the challenges faced by the nation-building project that is superimposed upon a capitalist economy." Evidence-Based Policy Making in the Social Sciences Sep 01 2022 This book gathers an expert group of social scientists to showcase emerging forms of analysis and evaluation for public policy analysis. Each chapter highlights a different method or approach, putting it in context and highlighting its key features before illustrating its application and potential value to policy makers. Aimed at upper-level undergraduates in public policy and social work, it also has much to offer policy makers and practitioners themselves.

Social Matter(s) Sep 20 2021 This book is inspired by material culture studies. Essays center on the idea that matter and materiality are integral dimensions of social life. The diversity of their subjects is reflected in the various approaches that bring together archeology, cultural heritage, artifacts, commodities, the human body, and the study of space. United by a common interest in various social matter(s), and coming from diverse schools of thought and academic traditions, the book is by no means an effort to present a clear, cohesive, collective manifesto. On the contrary, there might be differences in the way each of the contributors discusses materiality, matter, thingness, things, and artifacts. There are varied understandings of the terms and there are references to different sources and schools of thought. (Series: Ethnologie: Forschung und Wissenschaft - Vol. 23)

Teaching Social Studies that Matters Jan 25 2022 No plan to increase achievement and enact reform in the social studies classroom will succeed without recognizing the central importance of the teacher as the gatekeeper of instruction. In this book, Thornton details why teachers must develop strong skills in curriculum planning and teaching methods in order for effective instruction to occur. Thornton helps teachers to develop a vision of their practice that will build strong social studies programs and inspire students to learn. This book features replicable examples of the kinds of reflective practice that will enable teachers to animate classroom instruction and create a dynamic social studies curriculum and an analysis of how teachers adapt and shape state and district level curricula and classroom materials to fit the specific needs of their students, and a model of how to develop an instructional program with suggestions for lesson planning.

Why Social Movements Matter Jun 29 2022 A short, clearly written, lively popularisation that requires no previous familiarity with movements or movement research.

No Laughing Matter: Race Joking and Resistance in Brazilian Social Media Apr 15 2021 'No Laughing Matter: Race Joking and Resistance in Brazilian Social Media' examines the social phenomenon of construction and dissemination of colonial-like racist discourses fostered against upwardly-mobile black women through disparagement humour on social media platforms, adopting a fresh and innovative perspective. In this book, Luiz Vale Rio P. Trindade explores the idea that disparagement humour might not be as exempt of social impact as the jokers might believe, and that, in fact, this kind of humour reveals the hidden facet of deep-seated colonial ideologies still present in Brazilian society despite being hailed as a unique model of a post-racial society. The author argues that these ideologies establish and naturalise superior social positions and symbolic privileges to whites while undermining and delegitimising black women's upward social mobility. Social media platforms enable the proponents of these beliefs not only to engage in the practice of online hate speech but also to attract a considerable number of like-minded people, creating a long-lasting echo chamber effect in the cyberspace. This way, they manage to amplify the reach and reverberation of their racist discourses in the online environment in ways not commonly seen in Brazilian

offline social contexts. This monograph is of great interest and relevance to students, scholars, and researchers across a variety of disciplines, most notably Critical Race Studies, Media Communication Studies and Critical Humour Studies, and also academics in other areas such as Critical Discourse Analysis, Postcolonial Studies, Cultural Studies and Latin American Studies.

Climate Change and Society Mar 15 2021 This book explores the significance of human behaviour to understanding the causes and impacts of changing climates and to assessing varied ways of responding to such changes. So far the discipline that has represented and modelled such human behaviour is economics. By contrast *Climate Change and Society* tries to place the 'social' at the heart of both the analysis of climates and of the assessment of alternative futures. It demonstrates the importance of social practices organised into systems. In the fateful twentieth century various interlocking high carbon systems were established. This sedimented high carbon social practices, engendering huge population growth, increasing greenhouse gas emissions and the potentially declining availability of oil that made this world go round. Especially important in stabilising this pattern was the 'carbon military-industrial complex' around the world. The book goes on to examine how in this new century it is systems that have to change, to move from growing high carbon systems to those that are low carbon. Many suggestions are made as to how to innovate such low carbon systems. It is shown that such a transition has to happen fast so as to create positive feedbacks of each low carbon system upon each other. Various scenarios are elaborated of differing futures for the middle of this century, futures that all contain significant costs for the scale, extent and richness of social life. *Climate Change and Society* thus attempts to replace economics with sociology as the dominant discipline in climate change analysis. Sociology has spent much time examining the nature of modern societies, of modernity, but mostly failed to analyse the carbon resource base of such societies. This book seeks to remedy that failing. It should appeal to teachers and students in sociology, economics, environmental studies, geography, planning, politics and science studies, as well as to the public concerned with the long term future of carbon and society.

Matters of Fact (RLE Social Theory) Oct 29 2019 Facts may seem to be independent, but in this study Stanley Raffle looks at them as expressions of commitment. Medical records, he believes, furnish a principal example of the actively oriented character of the factual commitment, and he draws on his experience of research among the records of a large modern hospital to demonstrate this. He describes how records are produced and reorganized as records, and discusses the grounds which provide for all the features of the records. He looks at the act of 'observation' in many apparently and concretely different places, and analyses the activity of noticing, viewing, recording a spectacle, where what is observed supposedly remains untouched by the observing. Dr Raffle goes on to show that observation, events, records and criteria of assessment such as reliability and completeness lose their status as unexplicated verities and become, instead, decisive and consequential courses of action. He points out, too, that the Socratic dialogues exemplify an orientation to commitment that even medical records, paradoxically, require if they are to be the matters of fact that they are.

Making Social Science Matter Jan 05 2023 New approach demonstrating how social science can be successful, focusing on context, values, and power.

A Matter of Record Dec 12 2020 This textbook aims to give an introduction to the use of documentary sources in social research. It is designed to be a companion to courses in research methods in the social sciences and history and a reference text for those beginning research on documentary sources. The book begins with an overview of the nature of social research and the variety of methods which can be used. Scott identifies three types of evidence useful in such research – physical evidence, personal evidence and documentary evidence. He argues that the logic of research is common to each type of evidence, but that each involves specific methodological issues. An appraisal grid for the analysis of documents is presented, showing the criteria which must be used in evaluating documentary sources. In the following chapters these criteria are applied to the variety of documentary sources available to the social researcher: census data and official statistics; government publications; directories and yearbooks; personal diaries and letters.
