Human rights and criminal procedure Mar 08 2021 A practical tool for legal professionals who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work This is the second and expanded edition of a handbook intended to assist judges, lawyers and prosecutors in taking account of the requirements of the European Convention on Human Rights and its Protocols ("the European Convention") - and more particularly of the case law of the European Court of Human Rights - when interpreting and applying codes of criminal procedure and comparable or related legislation. Brands and Branding Aug 01 2020 With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of *Brands and Branding* provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, *Brands and Branding* sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

I Am Zlatan Ibrahimovic Jan 18 2022 *I AM ZLATAN* - the explosive, critically-acclaimed memoir of Zlatan Ibrahimovic, one of the world's most gifted and controversial footballers 'Guardiola has no balls. He drove me like a Fiat . . . I'm a Ferrari' Zlatan Ibrahimovic - professional football's most mercurial player, Swedish national hero, tabloid fixture, fashion icon, modern-day philosopher and black belt in Taekwondo. Born to a Muslim father from Bosnia, and a Catholic mother from Croatia, Zlatan recounts his extraordinary life story, from his poverty-stricken upbringing as an outsider in Malmö, Sweden, to becoming one of the world's most sought-after and expensive players, gracing Europe's finest clubs, from Ajax to Juventus, Internazionale to Barcelona, Milan to Paris Saint-Germain. *I AM ZLATAN* reveals a rare and ferocious intelligence, willpower and God-given talent most recently exhibited when Zlatan scored all 4 goals for Sweden in a 4-2 victory against England. His fourth goal, a 30-yard overhead kick with his back to goal is widely regarded as one of the greatest goals of all time. The BBC described it as a goal that 'combined unfathomable imagination and expert technique'. For fans of *The Secret Footballer* and *Football Manager Stole My Life* this no holds barred football memoir is every bit as dramatic and revealing as Roy Keane's classic autobiography. 'The best footballer's autobiography of recent years is probably *I Am Zlatan Ibrahimovic* . . .' Simon Kuper, author of *Why England Always Lose* 'Eagerly awaited, not least because Ibra seems to be spoiling for a fight on every other page. 'Dynamite' said one Swedish reporter' Daily Mail on *I AM ZLATAN*

Command Of The Air Nov 16 2021 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Modeling Creativity Sep 14 2021 Modeling Creativity (doctoral thesis, 2013) explores how creativity can be represented using computational approaches. Our aim is to construct computer models that exhibit creativity in an artistic context, that is, that are capable of generating or evaluating an artwork (visual or linguistic), an interesting new idea, a subjective opinion. The research was conducted in 2008-2012 at the Computational Linguistics Research Group (CLiPS, University of Antwerp) under the supervision of Prof. Walter Daelemans. Prior research was also conducted at the Experimental Media Research Group (EMRG, St. Lucas University College of Art & Design Antwerp) under the supervision of Lucas Nijis. Modeling Creativity examines creativity in a number of different perspectives: from its origins in nature, which is essentially blind, to humans and machines, and from generating creative ideas to evaluating and learning their novelty and usefulness. We will use a hands-on approach with case studies and examples in the Python programming language.

The Jews and Modern Capitalism Dec 05 2020 Since its first appearance in Germany in 1911, Jews and Modern Capitalism has provoked vehement criticism. As Samuel Z. Klausner emphasizes, the lasting value of Sombart's work rests not in his results-most of which have long since been disproved-but in his point of departure. Openly acknowledging his debt to Max Weber, Sombart set out to prove the double thesis of the Jewish foundation of capitalism and the capitalist foundation of Judaism. Klausner, placing Sombart's work in its historical and societal context, examines the weaknesses and strengths of Jews and Modern Capitalism.

Think Again Dec 29 2022 Instant #1 New York Times Bestseller Listed as a Times Self-Help Book of the Year Discover the critical art of rethinking: how questioning your opinions can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, the most crucial skill may be the ability to rethink and unlearn. Recent global and political changes have forced many of us to re-evaluate our opinions and decisions. Yet we often still favour the comfort of conviction over the discomfort of doubt, and prefer opinions that make us feel good, instead of ideas that make us think hard. Intelligence is no cure, and can even be a curse. The brighter we are, the blinder we can become to our own limitations. Adam Grant - Wharton's top-rated professor and #1 bestselling author - offers bold ideas and rigorous evidence to show how we can embrace the joy of being wrong, encourage others to rethink topics as wide-ranging as abortion and climate change, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, and how a vaccine whisperer convinces anti-vaxxers to immunize their children. Think Again is an invitation to let go of stale opinions and prize mental flexibility, humility, and curiosity over foolish consistency. If knowledge is power, knowing what you don't know is wisdom.

Networks of Outrage and Hope Feb 07 2021 Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society. Provincial Families of the Renaissance Feb 19 2022 Grubb's comprehensive analysis of his subjects' compelling, if inconspicuous, lives investigates every significant aspect of private experience during the Renaissance: marriage, birth, death, household relations, work, land, social status, and spirituality. Winner of the Society for Italian Historical Studies's Howard R. Marraro Prize Originally published in 1996. Historical writing on the Renaissance has usually focused on the social extremes that co-existed in the great metropolitan centers—on either elites or the underclass. As a result, the world of the middling families and provincial societies remains largely unexplored. Daily experiences in the lesser cities are, however, no less rich and revealing than those of Florence, Venice, and Milan. In addition, writes historian James Grubb, these experiences offer new perspectives from which to reassess familiar assumptions about domestic life in the fifteenth century. Based on memoirs and other records left by thirteen merchant families from the Veneto cities of Verona and Vicenza, Provincial Families of the Renaissance is an engrossing study of daily lives that have until now been overlooked by scholars. Grubb examines the attitudes and experiences of families undistinguished in their modest means and local ambitions from the majority of their compatriots, uncovering a detailed historical landscape rich in social obligations, commercial activities, and religious beliefs. Grubb's comprehensive analysis of his subjects' compelling, if inconspicuous, lives investigates every significant aspect of private experience during the Renaissance: marriage, birth, death, household relations, work, land, social status, and spirituality. In reconstructing provincial life in the Veneto, Grubb discovers in his subjects an independence of mind that mediated their reception of metropolitan ideologies far more than the historiography of the Renaissance might suggest. These "unremarkable" provincials were agents of their own destiny, influenced in equal measures by prevailing attitudes, local customs, and personal convictions. "James Grubb is exploring new terrain in this book. Distinguished by its clarity and eloquence, this is a superior work of historical writing and analysis that merits comparison with the best monographs on the social history of Renaissance Italy."—Gene Brucker, University of California at Berkeley

The Implications of Literacy May 30 2020 This book explores the influence of literacy on eleventh and twelfth-century life and though on social organization, on the criticism of ritual and symbol, on the rise of empirical attitudes, on the relationship between language and reality, and on the broad interaction between ideas and society. Medieval and early modern literacy, Brian Stock argues, did not simply supersede oral discourse but created a new type of interdependence between the oral and the written. If, on the surface, medieval culture was largely oral, texts nonetheless emerged as a reference system both for everyday activities and for giving shape to larger vehicles of interpretation. Even when texts were not actually present, people often acted and behaved as if they were. The book uses methods derived from anthropology, from literary theory, and from historical research, and is divided into five chapters. The first treats the growth and shape of medieval literacy itself. The other four look afresh at some of the period's major issues—heresy, reform, the Eucharistic controversy, the thought of Anselm, Abelard, and St. Bernard, together with the interpretation of contemporary experience—in the light of literacy's development. The study concludes that written language was the chief integrating instrument for diverse cultural achievements.

Megaprojects and Risk Sep 02 2020 Megaprojects and Risk provides the first detailed examination of the phenomenon of megaprojects. It is a fascinating account of how the promoters of multi-billion dollar megaprojects systematically and self-servingly misinform parliaments, the public and the media in order to get projects approved and built. It shows, in unusual depth, how the formula for approval is an unhealthy cocktail of underestimated costs, overestimated revenues, undervalued environmental impacts and overvalued economic development effects. This results in projects that are extremely risky, but where the risk is concealed from MPs, taxpayers and investors. The authors not only explore the problems but also suggest practical solutions drawing on theory, experience and hard, scientific evidence from the several hundred projects in twenty nations and five continents that illustrate the book. Accessibly written, it will be the standard reference for students, scholars, planners, economists, auditors, politicians and interested citizens for many years to come.
