Financial Soundness Indicators: Compilation Guide is intended to give guidance on the concepts, sources, and compilation and dissemination techniques underlying FSIs; to encourage the use and cross-country comparison of these data; and, thereby, to support national and international surveillance of financial systems.

**Mobile People, Mobile Law Aug 13 2021** Demonstrating how users of law, who often operate in multi-sited situations, are forced to deal with increasingly complex legal circumstances, this volume focuses on political and social processes through which people appropriate, use and create legal forms in multiple legal settings. It provides new insights into social and political processes through which transnational law is locally appropriated by different actors and presents empirical studies of confrontation, adaptation, vernacularization and hybridization of law due to its transplantation across the borders of national states. The contributors offer insights into modern dynamics of legal change, challenging assumptions about increasing homogeneity in law, with a keen eye for the historical situations in which current legal changes stand.

**Bank Resolution Aug 21 2019** Responding to lessons learned during the global financial crisis, the EU Directive on the Recovery and Resolution of Banks and Securities Firms (the BRRD) has substantially changed the legal framework for insolvency management of financial services institutions across Europe. As the legislative process has been completed with the adoption of the BRRD, and of Regulation No 806/2014 establishing the Single Resolution Mechanism, this book offers a unique insight into the new European framework for the resolution of banks in distress. The chapters in this volume take stock of what has been achieved and present an insightful

analysis of both the technical framework and its impact on banking institutions and their counterparties in representative forms of banking activities, including retail and wholesale depositors, counterparties to financial directives, and the providers of relevant parts of the market infrastructure. Special attention is given to the international coordination of resolution. The book's focus is on resolution and its impact on the relationships between banks, customers, other market participants and market infrastructure, including the preventative requirements on recovery and resolution planning under the BRRD. The chapters bring together a wide range of perspectives by scholars, practitioners from regulatory authorities and other parts of the financial safety net, as well as from private practice, from many jurisdictions, and both legal and economic backgrounds. Arranged broadly in line with the structure of the BRRD, the book is a highly useful reference for practitioners, policy-makers, and academics alike.

**Theory and Method in Socio-Legal Research Sep 26 2022** Socio-legal researchers increasingly recognise the need to employ a wide variety of methods in studying law and legal phenomena, and the need to be informed by an understanding of debates about theory and method in mainstream social science. The papers in this volume illustrate how a range of topics, including EU law, ombudsmen, judges, lawyers, Shariah Councils and the quality assurance industry can be researched from a socio-legal perspective. The objective of the collection is to show how different methods can be used in researching law and legal phenomena, how methodological issues and debates in sociology are relevant to the study of law, and the importance of the debate between "structural" and "action" traditions in researching law. It also approaches the methodological problem of how sociology of law can address the content of legal practice from a variety of perspectives and discusses the relationship between pure and applied research. The editors provide a critical introduction to each of the six sections, and a general introduction on law, sociology and method. The collection will provide an invaluable resource for socio-legal researchers, law school researchers and postgraduates.

**Islamic Science Jun 23 2022** Science was conceived as something absolute by the Positivists; they thus failed to see that it is basically a human activity and that no human phenomenon can be absolute. The discussion in this monograph takes its departure from this point and investigates the epistemological foundations of science. It argues that one such foundation is the worldview of the scientist which reflects his physical-social environment. If this is the case, then it becomes clear why there can be a certain scientific activity that can be identified as Islamic. This is the fundamental theoretical ground upon which *Islamic Science: Towards a Definition* is based. In order to demonstrate this point, the author attempts to present a historical illustration of how scientific activities gradually emerged in Islam within the first three centuries, i.e. 610-900 AD. The argument developed follows three frameworks that are said to be the foundation of these activities: 1) the Islamic worldview; 2) the Islamic scientific conceptual scheme; and 3) specific terminology of each science. These points are all defined and clarified from an epistemological standpoint.
