Ounce Jul 04 2020 Hervé Martijn's years of experience as a painter drive him to the extremes of his technical ability and question the nature of the true-to-life reality that he allows to appear on the canvas. Giving shape to a painted reality forces him to constantly make artistic choices. Martijn's lifelike translation consists of a painted diversity of reproductive possibilities with an inexhaustible and multipliable creative interpretation of an emotionally charged reality. His world, consisting mostly of women, is subtly manipulated on canvas by means of creative reinterpretation. Hervé Martijn's muses shrink from the viewer's gaze, or are stripped of their ability to look. A feeling of shame dominates the visible reality of those portrayed. In every painting the face is hidden or averted from the viewer's judgment. It is as if the outside world can only observe fragments of a reality that has been made fragile. A visible, emotionally suppressed pain is sublimated in the reproduction of long, vulnerable suffering. As if recording it on canvas would bear witness to a painted conviction that acceptance is the only way to deal with wounds in life. A way of being marked for life in paint. A merciless "Ounce" upon a time in a fragile reality.

What in the World Is an Ounce? Oct 07 2020 Introduces the ounce unit of measurement, including tools to use and examples of measured objects.

Ounce Dice Trice Dec 01 2022 What can words be, or rather, what can't they be? Poet Alastair Reid introduces children and adults to the wondrous waywardness of words in *Ounce Dice Trice*, a delicious confection and a wildly unexpected exploration of sound and sense and nonsense that is like nothing else. Reid offers light words (willow, whirr, spinnaker) and heavy words (galoshes, mugwump, crumb), words on the move and odd words, words that read both ways and words that read the wrong way around (rezagrats), along with much else. Accompanied by Ben Shahn's glorious drawings, *Ounce Dice Trice* is a book of endless delights, not to mention the only place where you can find the answer to the question: What is a gongoozler? Well, all I can say is quoz.

A Backpacker's Guide to Making Every Ounce Count Sep 29 2022 A Backpacker's Guide to Making Every Ounce Count was written by an avid outdoorsman, for those interested in knowing how a Gram Weenie thinks. If you are interested in lightening your pack a few ounces at a time, this book covers that very subject. Steven Lowe discusses how he used to pack for a trip and how he learned from the so-called "experts." After following their advice, he ended up with a very heavy pack and soon realized that there had to be a lighter way to backpack. A Backpacker's Guide to Making Every Ounce Count offers tips that may allow you to approach your pack from a different point of view, like cutting the tags from your clothes and cutting your toothbrush in half--all in the name of shaving a few ounces of weight. When planning a trip, you need to look at your gear and ask questions like, "How many ounces can I shave from this item?" This book offers some ideas on how to lighten a few ounces from any pack, reduce the weight on your Big Three, and help you define just what type of backpacker you are--a lightweight or an ultra-lightweight backpacker. There are sixteen ounces in a pound. If you can shave four ounces from four areas in your pack, you just shaved one pound from your pack. Every ounce truly does count. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports--books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

An Ounce of Prevention Nov 19 2021 In our complicated world, parents, young people, and youth leaders frequently face the subject of homosexuality. The author provides a balanced perspective on this complex issue, discussing its various physical, emotional, and spiritual aspects with wisdom and compassion.

An Ounce of Prevention Aug 05 2020 "The science of medicine was the first to discover that 'an ounce of prevention is worth a pound of cure, '" Henryk Sokalski reminds us as he begins this study of a unique United Nations mission. "In the political realm, however, its full potential has yet to be realized." Sokalski, former head of the

United Nations Preventive Deployment Force (UNPREDEP) in the former Yugoslav republic of Macedonia, provides the ultimate insider's look at the UN's attempt to establish a mission in this former Yugoslav republic before the imminent eruption of mass violence spilling over from neighboring Balkan states Serbia and its overwhelmingly ethnic Albanian province of Kosovo in particular. An "Ounce of Prevention" and the UNPREDEP mission itself begins in early 1995 with a telephone call to Sokalski at his Warsaw home from UN Secretary General Boutros-Ghali, and it ends several years later in a disappointing Security Council veto of the mission's renewal. In between, Sokalski's study of this "novel experiment in UN peacekeeping" describes the mission's three "pillars" as well as contending theories on preventive diplomacy and early preventive action, contemporary Balkan history, and the daily bureaucratic and human challenges of reinventing civil society. All the while, Sokalski attempts to answer the question of whether the mission's renewed mandate could have prevented the country's recent destructive insurgency and whether UNPREDEP's truncated success could serve as a model for future UN preventive deployments."

Collection of Recipes Jan 28 2020 Abstract: Recipes designed for use in foodservice institutions and homemakers' kitchens are presented in this collection from the Indiana University School of Medicine. Recipes provide ingredient quantities for individual as well as institutional-size portions. Instructions include information on necessary equipment, pan sizes, desired temperature of the final product, and serving suggestions. Recipes are categorized into 1) breakfast and brunch; 2) soups and chowders; 3) salads and dressings; 4) sandwiches; 5) meats, poultry, fish, and cheese; 6) vegetables and casseroles; 7) yeast breads and rolls; and 8) dessert. They can be easily incorporated into both regular and modified diets. Each recipe was tested, evaluated, and retested for consistency in both quality and yield.

I'm So Happy It's Happy Hour Dec 09 2020 Who doesn't enjoy a well-made drink and the opportunity for a little creative misbehavior? Anne Taintor's deliciously wry artwork is the perfect complement for the dozens of fabulous drink recipes in this chic collection. From classic sips-with-a-twist to unexpected treats such as the Greta Garbo, Slinky Mink, and 3 A.M. on a School Night, these sinfully delectable cocktails add style to any high-spirited occasion. Surely it's five o'clock somewhere

\$50,000 an Ounce! Jan 02 2023 It was Hal Decker's most perplexing case: find the thief who stole a rare Martian meteorite from an anonymous owner who has not reported it missing. With no suspects, motives or clues, his only lead is a two-gram slice of that precious

rock worth \$50,000 an ounce! Resorting to website research, phone line trickery and adroit persuasion, Decker uncovers 200 suspects from a dozen countries who might have stolen the original meteorite. During the course of his frenetic search he is bewitched by a lovely geologist, badgered by a passionate lady friend and baffled by a mysterious brunette tourist. In pursuit of his suspects, he travels 10,000 miles from San Francisco to Buenos Aires to Antarctica, fighting resistance every mile en route. Arriving at the Antarctic Peninsula, he hikes inland and discovers the secret of the missing meteorite. But now he is faced with the ultimate Polar disaster: stranded for the winter on the frozen continent without food and shelter, and no hope of rescue for nine months!

DIY Bitters Jun 02 2020 Make your own bitters at home to enhance your medicine cabinet, and your bar! Used since the Middle Ages, bitters are made by combining various plant botanicals and/or spices with 100-proof alcohol and letting them sit until the bitter and medicinal qualities have been extracted. Just a small amount of the resulting liquid can then be used to stimulate the digestive system and promote healthy digestion. This is why "apertifs" and "digestifs" are so popular--both then and now! *DIY Bitters* is a how-to guide that explores the history and health benefits of bitters, and shows you how to make your own bitters at home, to be used alone or in cocktails, tonics, and even main meals. Herbalists Jovial King and Guido Mase, owners of the bitters company Urban Moonshine, teach you how to make recipes for classic bitters like orange and angostura, or explore more innovative bitters like elderflower-echinacea-honey and chocolate love tonic. You can even find a guide for creating your own unique flavors from the plants and ingredients you have on hand. Whether enjoyed as an apertif, digestif, or as a remedy to settle an upset stomach, bitters are back!

Soda Politics Mar 12 2021 Sodas are astonishing products. Little more than flavored sugar-water, these drinks cost practically nothing to produce or buy, yet have turned their makers--principally Coca-Cola and PepsiCo--into a multibillion-dollar industry with global recognition, distribution, and political power. Billed as "refreshing," "tasty," "crisp," and "the real thing," sodas also happen to be so well established to contribute to poor dental hygiene, higher calorie intake, obesity, and type-2 diabetes that the first line of defense against any of these conditions is to simply stop drinking them. Habitually drinking large volumes of soda not only harms individual health, but also burdens societies with runaway healthcare costs. So how did products containing absurdly inexpensive ingredients become multibillion dollar industries and international brand icons, while also having a devastating impact on public health? In *Soda Politics*, the 2016 James Beard Award for Writing & Literature Winner, Dr. Marion Nestle answers this question by detailing all of the ways that the soft drink industry works overtime to make drinking soda as common and accepted as drinking water, for adults and children. Dr. Nestle, a renowned food and nutrition policy expert and

public health advocate, shows how sodas are principally miracles of advertising; Coca-Cola and PepsiCo spend billions of dollars each year to promote their sale to children, minorities, and low-income populations, in developing as well as industrialized nations. And once they have stimulated that demand, they leave no stone unturned to protect profits. That includes lobbying to prevent any measures that would discourage soda sales, strategically donating money to health organizations and researchers who can make the science about sodas appear confusing, and engaging in Corporate Social Responsibility (CSR) activities to create goodwill and silence critics. Soda Politics follows the money trail wherever it leads, revealing how hard Big Soda works to sell as much of their products as possible to an increasingly obese world. But Soda Politics does more than just diagnose a problem--it encourages readers to help find solutions. From Berkeley to Mexico City and beyond, advocates are successfully countering the relentless marketing, promotion, and political protection of sugary drinks. And their actions are having an impact--for all of the hardball and softball tactics the soft drink industry employs to maintain the status quo, soda consumption has been flat or falling for years. Health advocacy campaigns are now the single greatest threat to soda companies' profits. Soda Politics provides readers with the tools they need to keep up pressure on Big Soda in order to build healthier and more sustainable food systems.
