Liem Sioe Liong's Salim Group Jul 04 2020 After Suharto gained power in Indonesia in the mid-1960s, he stayed as the country's president for more than three decades, helped by the powerful military, hefty foreign aid and support from a coterie of cronies. A pivotal business backer for his New Order government was Liem Sioe Liong, a migrant from China, who arrived in Java in 1938. A combination of the Suharto connection, serendipity and personal charm propelled him to become the wealthiest tycoon in Southeast Asia. This is the story of how Liem built the Salim Group, a conglomerate that in its heyday controlled Indonesia's largest non-state bank, the country's dominant cement producer and flour mill, as well as the world's biggest maker of instant noodles. The book features exclusive input from Liem, who died in 2012, and his youngest son, Anthony Salim. It traces the founder's life and the group's symbiosis with Suharto, his generals and family. After the tumultuous 1997-98 Asian financial crisis sparked Suharto's fall and a backlash against the strongman's cronies, Anthony staved off the crushing of the debt-laden

group. Told in a journalistic style, the story of the Salim Group provides insights into Suharto's New Order. For business executives, students and anyone with an interest in Southeast Asia's largest economy, the volume makes a valuable contribution towards understanding the country's modern history.

Oligarchic Cartelization in Post-Suharto Indonesia Oct 19 2021 *Oligarchic Cartelization in Post-Suharto Indonesia* By: Boni Hargens As detailed in *Oligarchic Cartelization in Post-Suharto Indonesia*, a few ruling individuals from party organizations overpowered Indonesia's post-authoritarian, representative democracy. The legislative process of the 2017 Election Act was the case study employed to examine this assumption. The underlying thinking was that there was a contest between "wealth power" (oligarchy) and "participation power" (democracy). The power of wealth controls the party and government institutions. Notwithstanding the presence of participation power, there was, however, no balance between wealth power and participation power, because the formal control of politics was in the hands of party oligarchs. This study is purposed to bridge the gap in knowledge by exploring how the party oligarchs maintain the policymaking, reputedly using cartelized strategies, to defend the status quo. By employing the oligarchy and cartelization concepts, the central question of this inquiry focused on how the party oligarchs mastered the policy process in post-Suharto Indonesia. Qualitative findings indicated that the party oligarchs engineered the legal process in parliament applying cartelized strategies to defend privileges they obtained from collusive interpenetrations with the state. Understanding the "oligarchic cartelization" theoretical postulate is a fundamental step for party members to improve their performance in public offices. The results of this study can also be a useful reference for pro-democracy activists to defend the ontological essence of public participation in implementing representative democracy at an appropriate level.

CSR Strategies Jan 22 2022 Globalization has changed the nature of many markets. Previously protected local industries have been forced to become more competitive, a situation that provides both opportunities and challenges. Key among these is the challenge of implementing responsible business practices. Corporate social responsibility (CSR) is widely recognized as a worthy commitment to ensure sustainable benefit for both corporations and communities. CSR is also becoming an important base for businesses to build trust and confidence in their stakeholders, with the potential to provide a competitive edge. To ensure sustainable growth opportunities, companies should pursue the three key dimensional values of creation: Profit People Planet Well defined and strategic CSR activities will ensure an optimum balance between social, environmental, and economic factors for sustainable profits. Hence, CSR has to be embedded within the business strategy to provide a competitive edge in the areas of brand equity, corporate reputation, employee retention, and environmental conservation. Although the principles of CSR are essentially the same globally, each location still calls for different

emphasis in the implementation process. Successful application of CSR principles is directly influenced by the business understanding of its business strategy in proportion to the needs of the local community. As someone who has implemented all the above activities successfully, author Sri Urip is well placed to discuss effective CSR strategies to 21st century companies.

New Approach to Cultural Heritage May 02 2020 This book addresses questions about theories of heritage, its methodologies of research, and where its boundaries lie with tourism, urban development, post-disaster recovery, collective identities, memory, or conflict. This book is a collection of heritage studies from a critical perspective as a product of the 2018 ACHS (Association of Critical Heritage Studies) Conference in Hangzhou, the largest conference of its kind in Asia. The contributors cover a wide spectrum of issues in heritage studies, such as heritage management, accessibility to heritage, heritage conservation and heritage policy, and heritage representation. It also examines the various contexts within which heritage emerges and how heritage is constructed within that context. Analyses are based on not only representations of heritage but also on the performativity. Explorations touch upon community involvement, landscape history, children's literature, endangered food, architecture, advertisement, allotment garden, and gender and visual art. As heritage has always been a locus of contested verities, the book offers a variegated approach to heritage studies. It provides students and scholars new perspectives on heritage study.

The Politics of Economic Liberalization in Indonesia Apr 24 2022

This book examines the dynamics shaping the economic process of economic liberalisation in Indonesia since the mid-1980's. Much writing on the process of economic liberalisation in developing countries views economic liberalisation as the victory of economic rationality over political and social interests. In contrast, this book argues that economic liberalisation should not be understood in these terms, but rather in the way that political social interests shape processes of economic reform in both a positive and negative sense. Specifically, Rosser argues that economic liberalisation needs to be understood in terms of the extent to which economic crises shift the balance of power and influence within society away from coalitions opposed to reform and towards those in favour of reform. In the Indonesian context, the main coalitions that need to be examined in this respect are the politico-bureaucrats and the conglomerates who have generally opposed reform and mobile capitalists who have

generally supported reform. Based on extensive original research, and providing much new material, the book considers the politics of economic policy-making in Indonesia in a range of sectors including the capital market, intellectual property law, the banking industry, and the trade and investment sectors. Analysing why the nature of economic policy in Indonesia has varied over time, this study argues that there is nothing inevitable about a transition to a fully-fledged liberal market order in Indonesia, and outlines possible future scenarios for the country's political economy.

Southeast Asian Personalities of Chinese Descent Sep 29 2022 "This is a bold project recording the lives of a particular group of Southeast Asians. Most of the people whose biographies are included here have settled down in the ten countries that constitute the region. Each of them has either self-identified as Chinese or is comfortable to be known as someone of Chinese ancestry. There are also those who were born in China or elsewhere who came here to work and do business, including seeking help from others who have ethnic Chinese connections. With the political and economic conditions of the region in a great state of flux for the past two centuries, it is impossible to find consistency in the naming process. Confucius had stressed that correct names make for the best relationships. In this case, Professor Leo Suryadinata has been pursuing for decades the elusive goal of finding the right name to give to the large numbers of people who have, in one way or another, made their homes in, or made some difference to, Southeast Asia. I believe that, when he and his colleagues selected the biographies to be included here, they have taken a big step towards the rectification of identities for many leading personalities. In so doing, he has done us all a great service." - Professor Wang Gungwu, National University of Singapore
